

receivers of RSSM to document the transfer of custody of certain rail cars in writing or electronically and to retain these records for a minimum of 60 calendar days and make them available to TSA upon request. Specifically, section 1580.205 requires documentation of the secure exchange of custody of rail cars containing RSSM between: a rail hazardous materials shipper and a freight railroad carrier; two separate freight railroad carriers, when the transfer of custody occurs within a high threat urban area (HTUA), or outside of an HTUA, but the rail car may subsequently enter an HTUA; and a freight railroad carrier and a rail hazardous materials receiver located within an HTUA. TSA recommends that the documentation must uniquely identify that the rail car was attended during the transfer of custody, including car initial and number; identification of individuals who attended the transfer (names or uniquely identifying employee number); location of transfer; and date and time the transfer was completed.

Sections 1580.113, 1582.113, and 1584.113 requires that owner/operators of certain freight railroads, public transportation and passenger railroads, and over-the-road bus companies submit a security training program to TSA and maintain security training records.

In light of the revision to consolidate the collections, TSA will request OMB to discontinue OMB Control Number 1652-0066 *Security Training Program for Surface Transportation Employees* and will change the title of the collection under OMB Control Number 1652-0051 from "Rail Transportation Security" to "Physical Surface Transportation Security."

The total number of respondents for this collection is 2,070 and the annual burden is approximately 66,995 hours.

Dated: April 16, 2025.
