

(4) ways to minimize the burden of the collection of information on respondents, including using automated collection techniques when appropriate, and other forms of information technology.

The Administration for Community Living (ACL) at the Department of Health and Human Services (HHS) is requesting a generic clearance for purposes collecting data with a focus on the awareness, understanding, attitudes, preferences, or experiences of customers or other stakeholders relating to existing or future services, products, or communication materials. ACL defines routine customer feedback as information that provides useful insights to improve existing or future service deliveries, products, or communication materials. ACL is requesting approval for customer surveys with the purpose of the collecting data to assist the agency in improving existing or future service deliveries, products, or communication materials; responses are voluntary; the collection does not impose a significant

burden on respondents; the collection does not employ statistical methods to have practical utility; and the data results are not publicly shared.

The types of information collection activities will include:

1. Customer Comment Card/Complaint Form
2. Customer Satisfaction Qualitative Surveys
3. Technical Assistance
4. Usability Testing (e.g., website or Software)
5. Small Discussion Group
6. Focus Group
7. One-time or panel discussion groups
8. Moderated, un-moderated, in-person, and/or remote-usability studies
9. Testing of a survey or other collection to refine questions
10. Post-transaction customer surveys
11. On-line surveys

ACL was created around the fundamental principle that older adults and people of all ages with disabilities should be able to live where they choose, with the people they choose, and with the ability to participate fully

in their communities. By funding services and supports provided primarily by networks of community-based organizations, and with investments in research, education, and innovation, ACL helps make this principle a reality for millions of Americans. Integral to this role, ACL will use this mechanism to conduct routine customer feedback for ACL programs. The proposed data collection template may be found on the ACL website for review at: <https://www.acl.gov/about-acl/public-input>.

Estimated Program Burden: ACL estimates the burden of this collection of information as follows:

The annual burden hours (2,521) requested, and the anticipated number of respondents (10,086) are based on the number of potential customer feedback respondents. Over the course of a three-year clearance for this generic information collection, ACL estimates a three-year burden drawdown amount of 7,564.5 burden hours and 30,258 respondents.

ESTIMATED ANNUALIZED BURDEN TABLE

Type of respondent	Form	Annual number of respondents	Number of responses per respondent	Burden hours per response	Total annual burden hours
ACL Potential Customer or Stakeholder.	ACL Generic Clearance for the Collection of Routine Customer Feedback.	10,086	1	.25	2, 521
