Abstract: Under the authority of the Organic Act of 1916, the National Park Service (NPS) is responsible for protecting resources and providing for the enjoyment of current and future generations. Of increasing importance to the NPS, is the experience of virtual visitors to NPS virtual resources. The NPS Virtual Visitor Study is a new information collection request. The study will administer online surveys to users who visit NPS digital assets, including [NPS.gov](https://www.nps.gov), park-managed social media accounts, and the NPS Mobile App. The study's objectives are to describe the NPS virtual visitor population, understand their motivations, and determine which platforms are most effective. For one year, across four seasonal waves, this study will collect data through an online survey offered to NPS digital platform visitors.

The 21st Century Integrated Digital Experience Act, (44 U.S.C. 3501), was signed into law to improve the digital experience for government customers and reinforce existing requirements for federal public websites. The objectives of the NPS Virtual Visitor Study are to describe the NPS virtual visitor population, understand their motivations, determine which NPS digital assets and platforms are most effective, and identify where user needs are not being met to target resources for improvement. The results from this study will highlight the strengths and gaps in NPS digital offerings. Specifically, the study will inform a stronger virtual visitor monitoring program. A virtual visitor monitoring program will serve to measure the public's engagement and satisfaction with NPS digital assets over time.

Description

During the 1920s, human remains representing, at minimum, 19 individuals were removed by Harry Rimmer, an amateur archeologist, from locations reasonably believed to be

Kings County, CA; Muskogee County, OK; and Luna County, NM. These human remains became part of the collection of the museum established at Pittsburg State University (then the Kansas Teachers College of Pittsburg) at the time of their removal. No records have survived concerning the acquisition or accession, identification, or age of these human remains. Articles about the museum published in the university's student newspaper in the 1920s reveal that in the mid-1920s, Dr. William Brandenburg, the president of the university, invited Harry Rimmer, to help establish a natural history museum at the university. During the following several years, Mr. Rimmer traveled throughout the U.S., excavated known Native American burial sites in Kings County, CA, Muskogee County, OK, and Luna County, NM, and removed and shipped human remains to the university for the museum. The museum existed on campus until approximately 1970. No known individuals were identified. No associated funerary objects are present.

The human remains and associated funerary objects in this notice were removed from known geographic locations. These locations are the aboriginal lands of one or more Indian Tribes. The following information was used to identify the aboriginal land: treaties.

Disposition of the human remains described in this notice to a requestor may occur on or after April 10, 2023. If competing requests for disposition are received, Pittsburg State University must determine the most appropriate requestor prior to disposition.
