Title: Microbial Rules (Renewal).

Abstract: This ICR examines public water system (PWS), primacy agency, and EPA burden and costs for recordkeeping and reporting required in support of microbial contaminant-associated rulemakings. These rules that have recordkeeping and reporting requirements that are mandatory for compliance with 40 CFR parts 141 and 142 include the following: (1) Surface Water Treatment Rule (SWTR); (2) Total Coliform Rule (TCR); (3) Interim Enhanced Surface Water Treatment Rule (IESWTR); (4) Filter Backwash Recycling Rule (FBRR); and (5) Long Term 1 Enhanced Surface Water Treatment Rule (LT1ESWTR). This Microbial Rules ICR includes all SWTR components except disinfectant residual monitoring and associated activities, which are included in the Disinfectants and Disinfection Byproducts, Chemical, and Radionuclides Rules ICR. Burden for future rules that address microbial contaminants (Long Term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR), and the Ground Water Rule (GWR) will be added to this ICR when the regulations are finalized and the original stand-alone ICRs for each rule expires.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average .77 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the

time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: (1) Owners/operators of PWSs, who must report to the primacy agency; (2) primacy agencies that must report to EPA Headquarters; and (3) regional EPA administrators, who must send reports and notices to PWS owners and States.

Estimated Number of Respondents: 161,274.

Frequency of Response: As necessary, monthly, quarterly, annually.

Estimated Total Annual Hour Burden: 8,624,865.

Estimated Total Annual Cost: \$340,480,000, includes \$96,939,000 annualized capital or O&M costs and \$243,541,000 annual labor costs.

Changes in the Estimates: There is an increase of 431,665 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is primarily due to restructuring adjustments (*i.e.*, incorporation of previously stand-alone ICRs for the LT1ESWTR and the FBRR).

Title: Clean Water Act State Revolving Fund Program (Renewal).

Abstract: The Clean Water Act, as amended by "The Water Quality Act of 1987" (U.S.C. 1381–1387 *et. seq.*), created a Title VI which authorizes grants to States for the establishment of State Water Pollution Control Revolving Funds (SRFs). The information collection activities will occur primarily at the program level through the State "Intended Use Plan" and "Annual Report." The information is needed annually to implement section 606 of the Clean Water Act (CWA).

The 1987 Act declares that water pollution control revolving funds shall be administered by an instrumentality of the State subject to the requirements of the act. This means that each State has a general responsibility for administering its revolving fund and must take on certain specific responsibilities in carrying out its administrative duties. The information collection activities will occur primarily at the program level through the State Intended Use Plan and Annual Report. The information is needed annually to implement section 606 of the Clean Water Act (CWA). The Act requires the information to ensure national accountability, adequate public comment and review, fiscal integrity and consistent management directed to achieve environmental benefits and

results. The individual information collections are: (1) Capitalization Grant Application and Agreement/State Intended Use Plan, (2) Annual Report, (3) State Annual Audit, and (4) Application for SRF Financial Assistance.

(1) *Capitalization Grant Application and Agreement/State Intended Use Plan:* The State will prepare a Capitalization Grant application that includes an Intended Use Plan (IUP) outlining in detail how it will use all the funds available to the fund. The grant agreement contains or incorporates by reference the IUP, application materials, payment schedule, and required assurances. The bulk of the information is provided in the IUP, the legal agreement which commits the State and EPA to execute their responsibilities under the Act.

(2) *Annual Report:* The State must agree to complete and submit an Annual Report that indicates how the State has met the goals and objectives of the previous fiscal year as stated in the IUP and grant agreement. The report provides information on loan recipients, loan amounts, loan terms, project categories, and similar data on other forms of assistance. The report describes the extent to which the existing SRF financial operating policies, alone or in combination with other State financial assistance programs, will provide for the long term fiscal health of the Fund and carry out other provisions specified in the grant operating agreement.

(3) *Annual Audit:* Most States have agreed to conduct or have conducted a separate financial audit of the Capitalization Grant which will provide opinions on the financial statements, and a report on the internal controls and compliance with program requirements. The remaining States will be covered by audits conducted under the requirements of the Single Audit Act and by EPA's Office of Inspector General.

(4) *Application for SRF Financial Assistance:* Local communities and other eligible entities have to prepare and submit applications for SRF assistance to their respective State Agency which manages the SRF program. The State reviews the completed loan applications, and verifies that the proposed projects will comply with applicable Federal and State requirements.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are

identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 111 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 3,009.

Estimated Number of Respondents: 3,060.

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 339,405.

Estimated Total Annual Cost:

\$6,155,700, includes \$0 annual capital/startup and O&M costs and \$6,155,700 annual labor costs.

Changes in the Estimates: There is an increase of 76,500 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to the increase in the number of participants in the program, the individual burden still remains the same.
