

Sea Turtles

Threatened and endangered Green turtle (*Chelonia mydas*)

Endangered Hawksbill turtle (*Eretmochelys imbricata*)

Endangered Kemp's ridley turtle (*Lepidochelys kempii*)

Endangered Leatherback turtle (*Dermochelys coriacea*)

Threatened Loggerhead turtle (*Caretta caretta*)

The applicant requests a modification to Permit 1266. Permit 1266 authorizes the capture by trawl, handle, flipper tag and release of sea turtles while removing them from the path of hopper dredges. The Permit authorized the take of 30 loggerhead, 7 green, 5 Kemp's ridleys, 4 hawksbills and 4 leatherback sea turtles. These animals were measured, flipper tagged and released. Modification #1 would increase the authorized annual take to 350 loggerhead, 150 green, 150 Kemp's ridley, 10 hawksbill and 10 leatherback sea turtles for the purpose of moving them out of the path of hopper dredges and to tag the sea turtles for tracking purposes. The applicant would also begin passive integrated transponder (PIT) tagging the sea turtles.

SUPPLEMENTARY INFORMATION:**I. Abstract**

The Job Application Rating System (JARS) is a system by which the USPTO can rapidly review applications for employment of entry-level patent examiners. The Office of Human Resources (OHR), armed with a recommendation from a Supervisory Patent Examiner (SPE) can, in turn, rapidly make an offer of employment and support hiring actions with necessary administrative action. Over the past three fiscal years, JARS has enabled the Patent Corps to hire more than 1,600 entry-level patent examiners.
