*Title:* FERC-725HH, RF Reliability Standards.

*OMB Control No.:* 1902-0301.

*Type of Request:* Three-year renewal of FERC-725HH.

*Abstract:* This collection of information pertains to the Commission's compliance with section 215 of the Federal Power Act (FPA) (16 U.S.C. 824o), which enables the Commission to strengthen the reliability of the "bulk-power system."<sup>1</sup> The Commission's implementation of FPA section 215 involves review and approval of a system of mandatory Reliability Standards that are established and enforced by an "Electric Reliability Organization" (ERO).<sup>2</sup> The

<sup>1</sup> FPA section 251(a)(1) defines "bulk-power system" as follows: "(A) facilities and control systems necessary for operating an interconnected electric energy transmission network (or any portion thereof); and (B) electric energy from generation facilities needed to maintain transmission system reliability. The term does not include facilities used in the local distribution of electric energy."

<sup>2</sup> FPA section 215(a)(2) defines "Electric Reliability Organization" as "the organization certified by the Commission under subsection (c) the purpose of which is to establish and enforce reliability standards for the bulk-power system, subject to Commission review."
