

accept public comment for this action. There are no new quotas for 2020, and the quota formulas are the same as in previous years. NMFS therefore is issuing this temporary final rule to adjust the northern albacore, North and South Atlantic swordfish, and western Atlantic BFT quotas for 2020 without prior notice and an additional opportunity for comment.

There is good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effective date and to make the rule effective upon publication in the **Federal Register**. The fisheries for northern albacore, North and South Atlantic swordfish, and BFT began on January 1, 2020. NMFS monitors northern albacore, North and South Atlantic swordfish, and BFT annual catch and measures the annual catch data against the applicable available quotas. Delaying the effective date of these quota adjustments would affect reasonable opportunity to catch the available quotas. It could also cause complications for management under certain circumstances. For example, under the northern albacore fishery closure regulations, NMFS must close the fishery when the annual fishery quota is reached. Closure of the fishery based only on the baseline (codified) quota versus the adjusted northern albacore quota could preclude the fishery from harvesting northern albacore that are legally available consistent with the ICCAT recommendations and the 2006 Consolidated HMS FMP, as amended. Adjusting the North and South Atlantic swordfish quota allows the United States to take advantage of the ICCAT allowance to carry over quota underharvest and to comply with the South Atlantic swordfish recommendation's obligation to transfer quota internationally. Adjusting the BFT Reserve category as soon as possible provides NMFS the flexibility to transfer quota from the Reserve to other fishing categories inseason after considering the regulatory determination criteria, including fishery conditions at the time of the transfer.

This action is exempt from review under Executive Order 12866.

This action does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act.

Because prior notice and opportunity for public comment are not required for this rule by 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are inapplicable.

50 CFR Part 679

[Docket No. 200221-0062; RTID 0648-XA530]

Fisheries of the Exclusive Economic Zone Off Alaska; Exchange of Flatfish in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reallocation.

SUMMARY: NMFS is exchanging allocations of Amendment 80 cooperative quota (CQ) for Amendment 80 acceptable biological catch (ABC) reserves. This action is necessary to allow the 2020 total allowable catch (TAC) of flathead sole, rock sole, and yellowfin sole in the Bering Sea and Aleutian Islands management area (BSAI) to be harvested.

DATES: Effective September 28, 2020, through December 31, 2020.

FOR FURTHER INFORMATION CONTACT:

Steve Whitney, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2020 flathead sole, rock sole, and yellowfin sole Amendment 80 allocations of the TAC specified in the BSAI are 14,414 metric tons (mt), 36,060 mt, and 113,403 mt, respectively, as established by the final 2020 and 2021 harvest specifications for groundfish in the BSAI (85 FR 13553, March 9, 2020). The 2020 flathead sole, rock sole, and yellowfin sole Amendment 80 ABC reserves are 43,430 mt, 94,837 mt, and 98,425 mt, respectively, as established by the final 2020 and 2021 harvest specifications for groundfish in the BSAI (85 FR 13553, March 9, 2020).

The Alaska Seafood Cooperative has requested that NMFS exchange 1,530 mt of flathead sole Amendment 80 allocation of the TAC for 30 mt of rock sole and 1,500 mt of yellowfin sole Amendment 80 ABC reserves under § 679.91(i). Therefore, in accordance with § 679.91(i), NMFS exchanges 1,530 mt of flathead sole Amendment 80 allocation of the TAC for 30 mt of rock sole and 1,500 mt of yellowfin sole Amendment 80 ABC reserves in the BSAI. This action also decreases and increases the TACs and Amendment 80 ABC reserves by the corresponding amounts. Tables 11 and 13 of the final 2020 and 2021 harvest specifications for groundfish in the BSAI (85 FR 13553, March 9, 2020) and as revised (85 FR 59204, September 21, 2020) are further revised as follows:

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on

this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the flatfish exchange by the Alaska Seafood Cooperative in the BSAI. NMFS was unable to publish a notice providing time for public comment because the most recent,

relevant data only became available as of September 23, 2020.
