SUPPLEMENTARY INFORMATION:

Title: Highway Bridge and National Bridge Inspection Programs.

Background: The Highway Bridge and National Bridge Inspection Programs require bridge inspection and reporting at regular intervals for all highway bridges greater than 20 feet in length located on public roads. Title 23, U.S.C., Section 144 defines the Highway Bridge Program. Title 23, U.S.C., Section 151 defines the National Bridge Inspection Program. They are further defined in regulation, 23 CFR 650 C, National Bridge Inspection Standards, and 23 CFR 650 D, Highway Bridge Program. Inspections of fracture critical bridges and underwater inspections are also required at prescribed intervals. The bridge inspection information that is provided to the FHWA on an annual basis is summarized on the Structure Inventory and Appraisal (SI&A) Sheet. The inspection information is used for multiple purposes, including: (1) The determination of the condition of the Nation's bridges; (2) as a basis for setting initial priorities for the replacement or rehabilitation of bridges under the Highway Bridge Program (HBP); and (3) for apportioning HBP funds to the States for bridge replacement or rehabilitation. In order to apportion funds for the HBP, the law requires that a cost to replace or rehabilitate each bridge needs to be determined. In order to determine that cost, the FHWA collects data on new and replaced bridges from the States annually. In addition, the information is used for strategic national defense needs and for preparing an annual report to Congress on the status of the Nation's highway bridges.

Respondents: 52 State highway agencies including the District of Columbia and Puerto Rico, and Federal agencies. The number of inspections per respondent varies in accordance with the national bridge inventory.
