

golden tilefish (5); sand tilefish (10); triggerfish (25 total) (*Balistes spp.* including gray); ocean triggerfish (25); bullet mackerel (100); frigate mackerel (100); king mackerel (15); Spanish mackerel (15); wahoo (5); dolphin (50); and Atlantic cobia (6). Invertebrates (non-penaeid including golden crab (5), spiny lobster (25), and rock shrimp (25); penaeid shrimp including white, pink, and brown (400).

The project would use vertical hook-and-line gear with artificial and natural baits, black sea bass pots, spiny lobster traps, golden crab traps, octopus traps, hand nets, dip nets, minnow traps and bait traps, and minnow traps. No black sea bass pots, spiny lobster traps, and golden crab traps would be deployed between November 1 and April 30 of each year to avoid interactions with North Atlantic right whales during their calving season. Bait traps and minnow traps would be deployed year round by hand by divers using SCUBA gear. Octopus traps would be deployed year round without lines with buoys going to the surface. Most of the sample collections would be done in less than 300 ft (91 m) of water. No more than five each, black sea bass pots, lobster pots, golden crab traps, minnow traps, and bait traps would be deployed with a soak time of no more than 5 hours at a time, and would not be tied together on a groundline. Up to 10 octopus traps would be deployed in depths less than 100 ft (30.5 m) with a soak time of about 7 days (not to exceed 30 days). These traps are open at one end to allow animals to escape, and are designed for octopuses. All trap and pot gear would be deployed either by hand by divers using SCUBA or through using individual nylon lines with buoys. All gear types described in this paragraph would be utilized for the collection of requested species. This EFP would authorize sampling operations to be conducted on three vessels designated by and operated by personnel from the South Carolina Aquarium.

All attempts would be made (venting, descending device, controlled ascent and descent, etc.) to release all non-targeted bycatch species alive.

NMFS finds this application warrants further consideration based on a preliminary review. Possible conditions the agency may impose on this permit, if the permit is granted, include but are not limited to, a prohibition on conducting sampling activities within marine protected areas, marine sanctuaries, or special management zones, without additional authorization, and requiring compliance with best practices in the event of interactions with any protected species. NMFS would require any sea turtles taken incidentally during the course of fishing or scientific research activities to be handled with due care to prevent injury to live specimens, observed for activity, and returned to the water. Currently, NMFS prohibits the possession of Nassau grouper, goliath grouper, speckled hind, warsaw grouper, and red snapper, but intends to authorize their collection as requested in the application, with the exception of Nassau grouper. Nassau grouper would not be authorized for collection.

A final decision on issuance of the EFP will depend on NMFS' review of public comments received on the application, consultations with the affected states, the Council, and the U.S. Coast Guard, and a determination that it is consistent with all applicable laws.
