

HUD’s Office of Native American Programs (ONAP) administers the IHBG program and offers contracted training and technical assistance to IHBG recipients on program requirements. ONAP’s Notice of Funding Opportunity for training and technical assistance services includes the requirement for

the contractor(s) to use an OMB-approved evaluation form at all ONAP-sponsored events. At the end of each training and technical assistance event, participants are invited to voluntarily complete the Training and Technical Assistance Evaluation Form (form HUD–5879) to assess training and

technical assistance effectiveness and solicit ideas for improvement. Form HUD–5879 is a two-page survey instrument and does not collect any personally identifiable information, including a participant’s name.

SUPPLEMENTARY INFORMATION: The purpose of the proposed action is approval the IRMP for the Tribes' natural and cultural resources. The proposed action updates the original IRMP that was prepared and implemented in 2000. The IRMP incorporates management goals and objectives for the commercial forest, rangeland, and agricultural lands of the Tribes.

The Tribes' forest products industry, livestock grazing, and agriculture have the potential to impact the natural and

human environments of the Reservation. The FEIS analyzes the potential impacts associated with these activities. These include impacts to land resources such as geology, minerals, and soils, watershed function, surface and groundwater resources, air quality, biological resources, cultural and paleontological resources, socioeconomic conditions, transportation and forest access roads, land use, public services, noise, aesthetics, recreation, climate change, cumulative effects, and indirect and growth-inducing effects.

The FEIS considers five management alternatives developed by the Tribes' IRMP Core Team. The interdisciplinary team developed these management alternatives for consideration and analysis and designated a preferred alternative (Alternative 2) that was approved by the Colville Business Council in June 2014. The team also conducted a community survey in 2014 that asked community members to choose a preferred alternative. All groups were unanimous in selecting Alternative 2 as the preferred alternative. The alternatives are:

1. Continue the Current Management Strategy
2. Enhance and Improve the Current Management Strategy (Preferred Alternative)
3. Concentrate on Forest and Rangeland Health Problems
4. Expand Forest and Livestock Production
5. Eliminate Timber Harvesting and Livestock Grazing

A Notice of Intent (NOI) to prepare an EIS was released in the **Federal Register** on November 21, 2014 (79 FR 69521). Public scoping meetings were held in four Reservation communities in October 2015, and a Scoping Meetings Report was released in March 2016. An administrative draft DEIS was prepared and reviewed by the IRMP Core Team and appropriate revisions were incorporated along with supplemental information.

The Draft EIS (DEIS) was completed in November 2016. Notices of Availability (NOA) were published in the **Federal Register** by the BIA on June 14, 2017 (82 FR 27278) and the EPA on July 28, 2017 (82 FR 35200). The public review period ended on September 11, 2017. The Response to Comments was released on January 24, 2018. The original FEIS was completed on August 14, 2018, and page-count revisions were completed on December 18, 2018.
