

(PET), Polystyrene (PS), and Styrene Acrylonitrile (SAN). This information is being collected to assure compliance with 40 CFR part 63, subpart JJJ.

Form Numbers: None.

Respondents/affected entities: Each new and existing thermoplastic product process unit (TPPU) and associated equipment that produces the subset of polymers and resins known as "Group IV Polymers and Resins" that is a major source of organic hazardous air pollutants (HAPs).

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart JJJ).

Estimated number of respondents: 24 (total).

Frequency of response: Initially, occasionally, semiannually, and quarterly.

Total estimated burden: 141,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$19,300,000 (per year), includes \$10,300,000 annualized capital or operation & maintenance costs.

Changes in the estimates: There is no change in burden from the most recently approved ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. There is an adjustment increase in the capital/startup or operation and maintenance (O&M) costs, which have been adjusted to reflect 2023 dollars using the CEPCI CE index.

Courtney Kerwin,

Director, Information Engagement Division.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2020-0634; FRL-12631-01-OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NESHAP for the Secondary Lead Smelter Industry (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for the Secondary Lead

Smelter Industry (EPA ICR Number 1686.13, OMB Control Number 2060-0296) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through February 28, 2025. Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before March 31, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2020-0634, to EPA online using www.regulations.gov (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Muntasir Ali, Sector Policies and Program Division, Office of Air Quality Planning and Standard, D243-05, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (919) 541-0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through February 28, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period (88 FR 31748). This notice allows for an additional 30 days for public comments. Supporting documents,

which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Secondary Lead Smelter Industry (40 CFR part 63, subpart X) were proposed on June 9, 1994; promulgated on June 13, 1997; and amended on: June 13, 1997, January 5, 2012, January 3, 2014, and November 19, 2020. These regulations apply to both existing facilities and new facilities that operate furnaces to reduce scrap lead metal and lead compounds to elemental lead. Specifically, the rule applies to secondary lead smelters that use blast, reverberatory, rotary, or electric smelting furnaces to recover lead metal from scrap lead, primarily from used lead-acid automotive-type batteries. New facilities include those that either commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart X.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Secondary lead smelter facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart X).

Estimated number of respondents: 11 (total).

Frequency of response: Semiannually, annually.

Total estimated burden: 19,900 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$2,750,000 (per year), which includes \$238,000 annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease of 1,800 hours in the total estimated respondent burden compared

with the ICR currently approved by OMB. This decrease is due to a decrease in the number of sources from twelve to eleven compared to the previously approved ICR. The decrease in sources also resulted in a decrease in the Capital and O&M costs.

Courtney Kerwin,

Director, Information Engagement Division.

Abstract: The NESHAP for Manufacturing of Nutritional Yeast were promulgated on May 21, 2001 and the Risk and Technology Review Amendments were published on October 16, 2017. This rule applies to facilities where the total hazardous air pollutants (HAP) emitted are either greater than or equal to 10 tons per year of any single HAP, or where the total HAP emitted are either greater than or equal to 25 tons per year of any combination of HAP. The Nutritional Yeast NESHAP sets emission limits for fermenter operations at nutritional yeast manufacturing facilities. This information is being collected to assure compliance with 40 CFR part 63, subpart CCCC.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected

facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required of all affected facilities subject to the NESHAP.

Form Numbers: None.

Respondents/affected entities: Nutritional yeast manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart CCCC).

Estimated number of respondents: 4 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 1,410 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$969,000 (per year), which includes \$776,000 annualized capital or operation & maintenance costs.

Changes in the estimates: There is no change in hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Courtney Kerwin,

Director, Information Engagement Division.
