

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR-520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR-520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) AMOCs approved for AD 2019-22-02 are approved as AMOCs for the corresponding provisions of Boeing Special Attention Service Bulletin 747-25-3644, Revision 2, dated January 27, 2023, and Boeing Special Attention Service Bulletin 747-25-3653, Revision 2, dated January 27, 2023, that are required by paragraphs (g) and (h) of this AD.

(5) For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (k)(5)(i) and (ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or substep is labeled "RC Exempt," then the RC requirement is removed from that step or substep. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

RIN 2120-AA66

Modification of Class D and Class E Airspace; Abbotsford Airport, Abbotsford, BC

AGENCY: Federal Aviation Administration (FAA), DOT.

SUPPLEMENTARY INFORMATION:**History**

The FAA published a final rule in the **Federal Register** (89 FR 99700; December 11, 2024) for Docket FAA-2024-2440, which modified Class D and Class E airspace at Abbotsford Airport, Abbotsford, BC. Subsequent to publication, the FAA identified that line four of the Class D airspace legal description contained the incorrect geographic location for the Vancouver very high frequency omnidirectional range/tactical air navigation (VORTAC). This action corrects the error by removing the reference to the Vancouver VORTAC and replacing it with "Point in Space B" for description purposes.
