

Needs and Uses: The Commission uses these notifications in order to effectively discharge its statutory duty to determine whether a particular ocean common carrier is a controlled carrier and therefore subject to the requirements of 46 U.S.C. 40701–40706.

Frequency: The submission of notifications from controlled carriers is not assigned to a specific time frame by the Commission; they are submitted as circumstances warrant. The Commission only requires notification when a majority portion of an ocean common carrier becomes owned or controlled by a government, or when a controlled carrier newly begins operation in any United States trade.

Type of Respondents: Controlled carriers are ocean common carriers which are owned or controlled by a government.

Number of Annual Respondents: The Commission cannot anticipate when a new controlled carrier may enter the United States trade or when ownership or control of a carrier will change so that notification is required. Over the past three years, the Commission has received, on average, fewer than one notification per year.

Estimated Time per Response: The estimated time for each notification is 2 hours.

Total Annual Burden: For purposes of calculating total annual burden, the Commission assumes one response annually. The Commission thus estimates the total annual burden to be 2 hours (1 response × 2 hours per response).

Rachel E. Dickon,
Secretary.

BILLING CODE P

changes to continue collecting data for the study Variations in Implementation of Quality Interventions (VIQI). In addition to extending data collection, OPRE proposes to update burden estimates to accommodate a different sample size of centers, administrators, teachers, and coaches; to revise data collection instruments and activities for the impact evaluation and process study in line with lessons learned during the pilot study; to add a second timepoint of data collection for the teacher reports to questions about children; to provide one new instrument to collect parent report of children's skills and behaviors; and to provide one new instrument in anticipation of COVID–19 necessitating further information gathering to contextualize findings from the impact evaluation and process study.

DATES: *Comments due within 30 days of publication.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

SUPPLEMENTARY INFORMATION:

Description: Through the VIQI Project, OPRE aims to inform policymakers, practitioners, and stakeholders about effective ways to support the quality and effectiveness of early care and education (ECE) centers for promoting young children's learning and development. The VIQI Project completed a pilot study in about 40 centers in three metropolitan areas in 2018–2019 that is informing a year-long impact evaluation and process study that involves testing the effectiveness of two curricular and professional development models aiming to strengthen the quality of classroom processes and children's outcomes. The impact evaluation and process study is expected to begin in the fall of 2021 and will include about 140 community-based and Head Start ECE centers spread across about 12 different metropolitan areas in the United States.

The VIQI Project will consist of a 3-group experimental design where the initial quality and other characteristics of ECE centers are measured. For details
