SUPPLEMENTARY INFORMATION:

I. Background

DoD is establishing the Declared Public Health Emergency Exposure Records, DoD–0013 as a DoD-wide Privacy Act system of records. A DoD-wide system of records notice (SORN) supports multiple DoD paper or electronic recordkeeping systems operated by more than one DoD component that maintain the same kind of information about individuals for the same purpose. The establishment of DoD-wide SORNs helps DoD standardize the rules governing the collection, maintenance, use, and sharing of personal information in key areas across the enterprise. DoD-wide SORNs also reduce duplicative and overlapping SORNs published by separate DoD components. The creation of DoD-wide SORNs is expected to make locating relevant SORNs easier for DoD personnel and the public, and create efficiencies in the operation of the DoD privacy program.

DoD prioritizes the safety of its workforce to ensure Department’s missions are able to be accomplished successfully at all times in defense of the Nation. To do that, DoD must maintain operationally ready capabilities, including operating within degraded environments such as during a DPHE. Public health emergencies are varied; they may be broad or limited in geographical scope and may be declared by various authorities such as the Secretary of Health and Human Services or the responsible, designated State, local, tribal, or territorial official, or cognizant military commander. Responses to public health emergencies depend on the nature of the emergency, but in some cases the degraded environment created by the public health emergency may require the DoD to collect personal information to ensure a safe and secure workplace for employees and visitors to DoD facilities, and ultimately, to ensure DoD is able to continue to carry out its mission.

DoD Instruction 6200.03, “Public Health Emergency Management within the DoD,” establishes DoD policy for DPHE. This includes the authority and responsibilities of DoD commanders and other officials during a DPHE, and various activities that may be required to address the emergency. For example, paragraph 3.1.d(1) provides that DoD
