**SUMMARY:** The Director of the Office of Ecosystem Protection, Environmental Protection Agency—New England (EPA-NE), is today providing notice of the availability of the Draft National Pollutant Discharge Elimination System (NPDES) general permit for construction dewatering activity discharges to certain waters of the States of Massachusetts and New Hampshire as authorized by section 301(a) of the Clean Water Act. Construction dewatering activity is defined as pumped or drained discharges of groundwater and/or stormwater from excavations or other points of accumulation associated with a construction activity.

Owners and/or operators of sites that discharge groundwater and/or stormwater from construction dewatering activities, including those currently authorized to discharge under the expired general permit, will be required to submit an NOI to EPA-NE to be covered by the appropriate general permit and will receive a written notification from EPA-NE of permit coverage and authorization to discharge under the general permit. The general permit does not cover new sources as defined under 40 CFR 122.2.
