

sufficient data are collected to produce nationally representative estimates for the 2022 survey, NSDUH will continue to employ a mix of in-person and web-based modes of administration to allow those respondents living in areas with COVID-19 restrictions the opportunity to participate. If the COVID-19 pandemic subsides to such levels to allow in-person data collection to resume nationwide, SAMHSA may reassess that multimode data collection model as part of the 2022 NSDUH.

In those areas where in-person data collection is permitted, NSDUH protocols, processes, and materials will continue to reflect the need to ensure the safety of respondents and field interviewers with respect to COVID-19—after initial implementation of such measures beginning in October 2020—which include equipping field interviewers with masks, gloves,

disinfecting wipes, and hand sanitizer for use during data collection and providing a COVID-19 risk information form to all respondents.

In addition, the NSDUH questionnaire must be updated periodically to reflect changing substance use and mental health issues and to continue producing current data. For the 2022 NSDUH, the following questionnaire updates are planned: (1) Replacing the tobacco module with a redesigned nicotine module that includes questions about vaping, removes low priority items to reduce respondent burden and eliminates outdated terminology; (2) revising the marijuana module to include questions about the use of CBD, update questions on the mode of administration and eliminate outdated terminology and includes changes to the market information for marijuana questions; (3) redesigning the adult and

youth mental health services utilization modules into one Mental Health Service Utilization model to remove questions with outdated terminology and include questions about newer treatments with recent increases in popularity; and (4) replacing the drug treatment module with a redesigned alcohol and drug treatment module that includes questions about newer treatments and those that have increased in popularity, as well as eliminating outdated terminology and reducing respondent burden.

As with all NSDUH/NHSDA¹ surveys conducted since 1999, the sample size of the NSDUH main study for 2022 will be sufficient to permit prevalence estimates for each of the fifty states and the District of Columbia. The total annual burden estimate for the NSDUH main study is shown below in Table 1.

TABLE 1—ANNUALIZED ESTIMATED BURDEN FOR 2022 NSDUH

Instrument	Number of respondents	Responses per respondent	Total number of responses	Hours per response	Total burden hours
Household Screening	168,674	1	168,674	0.083	14,000
Interview	67,507	1	67,507	1.000	67,507
Screening Verification	5,060	1	5,060	0.067	339
Interview Verification	10,126	1	10,126	0.067	678
Total	168,674	251,367	82,524

Coast Guard

[Docket No. USCG-2020-0042]

Consolidation of Redundant Coast Guard Boat Stations—Decision; Correction

AGENCY: Coast Guard, DHS.

ACTION: Notice; correction to docket number.

SUMMARY: The Coast Guard published a document in the **Federal Register** on March 30, 2021, concerning a notice of a decision on a consolidation of Coast Guard boat stations. The document contained an incorrect docket number. **DATES:** This correction is effective April 5, 2021.

FOR FURTHER INFORMATION CONTACT: For information about this document call or email Todd Aikins, Coast Guard Office of Boat Forces; telephone 202-372-2463, email todd.r.aikins@uscg.mil.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of March 30, 2021, in FR Doc. 2021-06461, on page 16604, in the second column, in the heading, the docket number, “USCG-2021-0178”, is corrected to read “USCG-2020-0042”. This corrects the error in the docket number and will ensure that this decision notice will be placed in the same docket as the notice soliciting comments regarding these boat stations (85 FR 8601, February 14, 2020).

Dated: March 30, 2021.

J.E. McLeod,

Acting Office Chief, Office of Regulations and Administrative Law.
