Animal and Plant Health Inspection Service

Title: Pale Cyst Nematode; Quarantine and Regulations.

OMB Control Number: 0579-0322.

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701-7772), The Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement of plants and plant pests to prevent the introduction of plant pests into the United States or their dissemination within the United States. The Animal and Plant Health Inspection Service (APHIS) amended the "Domestic Quarantine Notices" in 7 CFR part 301, subpart titled "Potato Cyst Nematode" (§.86 through 301.86.9, referred to as the regulations) by quarantining parts of Bingham and Bonneville Counties, ID, due to the discovery of the Potato Cyst Nematode there and establishing restrictions on the interstate movement of regulated articles from the quarantined area.

Need and Use of the Information: APHIS will collect information using certificates, limited permits and compliance agreements to prevent the spread of PCN and to ensure that regulated articles can be moved safely from the quarantined area without spreading PCN. If APHIS did not collect this information, the spread of PCN in the United States could result in a loss of domestic or foreign makers for U.S. potatoes and other commodities.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 152.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 342.

Animal and Plant Health Inspection Service

Title: Importation of Mangoes from Australia.

OMB Control Number: 0579-0391.

Summary of Collection: Under the Plant Protection Act (PPA) (7 U.S.C 7701—*et seq.*), the Secretary of Agriculture is authorized to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests new to the United States or not known to be widely distributed throughout the United States. The regulations in "Subpart—Fruits and Vegetables" (Title 7, CFR 319.56) prohibit or restrict the importation of fruits and vegetables into the U.S. from certain parts of the world. The Animal and Plant Health Inspection Service (APHIS) is responsible for carrying out these duties. APHIS has

amended the fruits and vegetables regulations to allow, under certain conditions, the importation into the U.S. of commercial consignments of fresh mangoes from Australia.

Need and Use of the Information: Conditions for the importation of fresh mangoes from Australia include requirements for pest exclusion at the production site, irradiation treatment, fruit fly trapping inside and outside the production site, pest-excluding packinghouse procedures, port-of-entry inspections and accompanied by a phytosanitary certificate issued by the National Plant Protection Organization of Australia with an additional declaration confirming that the mangoes have been produced in accordance with the requirements. APHIS will use this information to allow the importation of commercial consignments of fresh mangoes from Australia into the United States. Failing to collect this information would cripple APHIS ability to ensure that mangoes from Australia are not carrying plant pests.

Description of Respondents: Federal Government.

Number of Respondents: 20.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 50.

The Form ITA–340P is used to provide the data to assist in verification of duty-free shipments of watches into the United States and make certain the allocations are not exceeded. Forms ITA–360P and ITA–361P are necessary to implement the duty-refund program for the watch and jewelry producers. Form ITA–360P requires no information unless the recipient wishes to transfer the certificate. Form ITA–361P must be completed each time a certificate holder wishes to obtain a portion, or all, of the duty-refund authorized by the certificate. The duty-refund benefit is issued biannually and the forms are used for the distribution of the duty-refund benefit.
