The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, it must also serve a copy of the document on that resource agency.

k. *Description of Request:* The Town of Stuyvesant, New York and Albany Engineering Corporation (licensees) propose to remove from the project license the unconstructed 120-kilowatt minimum flow turbine-generator unit and associated transmission line as authorized in the April 5, 2013 Order Issuing New License. Article 403 of the license requires the licensees to provide a continuous minimum flow of 65 cubic feet per second (cfs) into the bypassed reach, composed of 15 cfs over the project dam in the form of spill and 50 cfs through the minimum flow turbine to be installed at the project intake. Until the authorized minimum flow turbine is installed, the licensees must release all required minimum flows over the project dam. Because of ongoing property rights issues at the project, the licensees have not been able to construct the authorized minimum flow turbine. Therefore, instead of installing the minimum flow turbine, the licensees propose to continue to release the required 65-cfs minimum flow over the project dam as they currently do.
