

part 567 does not contain tire and rim information for tires and rims that were installed as original equipment, the information pertains to tires and rims that are appropriate for use on the vehicles. BMW also argues that the noncompliance is inconsequential to motor vehicle safety for the following reasons:

1. If a driver only checks the certification label (which indicates either 17-inch tires or 18-inch tires) or if the driver checks the certification label and the FMVSS No. 110 tire and loading information Vehicle Placard (which shows the size of the tires originally installed on the vehicle), and is unsure as to the proper inflation pressure and the size of the tires installed on the vehicle, there are a number of information sources and services available which can be used to inform the driver of the correct tire size and tire pressure.

a. A driver could check the specific tires installed on the vehicle. The information that is stamped onto the sidewall of those tires corresponds to the information contained on the FMVSS No. 110 tire and loading information Vehicle Placard. A driver would be able to determine that the tires installed on the vehicle correspond to the tires indicated on the FMVSS 110 tire and loading information Vehicle Placard. Therefore, a driver would be able to add the correct amount of air pressure to the tires in order to achieve the proper inflation level.

b. If the driver were to use the tire size shown on the certification label in order to look up the associated tire pressure in the owner's manual and then pressurize the tires to that pressure the Tire Pressure Monitoring System would not need to initiate.

c. The driver will also be able to refer to the vehicle's Owner's Manual which contains information pertaining to the various tire sizes and tire pressures for the affected vehicles.

d. BMW also offers Roadside Assistance and BMW Assist (only included with Premium Package and as a stand-alone option) which are available 24 hours/day with representatives that are available to provide drivers with all of the available tire sizes and specifications for the affected vehicles.

BMW has received no customer complaints and are unaware of any accidents or injuries regarding this noncompliance of the affected vehicles.

BMW has additionally informed NHTSA that it has corrected future production and that all other required markings are present and correct.

BMW also explains that NHTSA has previously granted similar petitions.

In summation, BMW believes that the described noncompliance of its certification labels is inconsequential to motor vehicle safety, and that its petition, to exempt from providing recall notification of noncompliance as required by 49 U.S.C. 30118 and remedying the recall noncompliance as required by 49 U.S.C. 30120 should be granted.
