

Dallas County Domestic Violence Court, and a sample of men living in Dallas County. The study participants will include two samples of men, who will be asked to complete a survey developed and tested by experts in the field of psychology and sociology. The

study will include psychological assessments of attachment depression, anger and sociological assessments of peer support for violence, attitudes toward violence, and attitudes toward sex roles.

The data will be collected to further understand the psychological and

sociological correlates of battering (e.g., male battering of female partners), which will in turn assist in developing models for intervention programs. The estimated annualized burden is 899 hours.

Data collection activity	Number of respondents	Frequency of response	Average burden per response (in hours)
Screener In-person Sample	583	1	6/60
Screener *RDD Sample	1,400	1	6/60
**IPV Survey	700	1	1

*Random Digit Dialing Sample.

**Intimate Partner Violence Survey.
