Abstract: Section 303(d) of the Clean Water Act requires States to identify and rank waters which cannot meet water quality standards (WQS) following the implementation of technology-based controls. Under Section 303(d), States are also required to establish total maximum daily loads (TMDLs) for listed waters not meeting standards as a result of pollutant discharges. In developing the Section 303(d) lists, States are required to consider various sources of water-quality related data and

information, including the Section 305(b) State water quality reports. The State Section 305(b) reports contain information on the extent of water quality degradation, the pollutants and sources affecting water quality, and State progress in controlling water pollution.

EPA's Assessment and Watershed Protection Division (AWPD) works with its Regional counterparts to review and approve or disapprove State Section 303(d) lists and TMDLs from 56 respondents (the 50 States, the District of Columbia, and the five Territories). Section 303(d) specifically requires States to develop lists and TMDLs "from time to time" and EPA to review and approve or disapprove the lists and the TMDLs. EPA also collects State 305(b) reports from 59 respondents (the 50 States, the District of Columbia, five Territories, and 3 River Basin commissions).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 66,590 hours per year per respondent for the 56 respondents with both 305(b) and 303(d) responsibilities and TMDL development activities. The average reporting burden for the 3 respondents with only 305(b) responsibilities is estimated at 3,659 hours per year. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: States, Territories, River Basin Commissions.

Estimated Number of Respondents: 59.

Frequency of Response: Biennially.

Estimated Total Annual Hour Burden: 3,740,017.

Estimated Total Annual Cost: \$177,837,808, includes no capital or O&M costs.

Changes in the Estimates: There is no change in hours in the total estimated

burden currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: December 12, 2007.

Sara Hisel-McCoy,

Director, Collection Strategies Division.
