

charges where that customer has contacted his current LEC or his current IXC to select "no-PIC" status.

Paragraph 64.4002(e) of the Commission's rules is modified to include the effective date of any changes to a customer's local service account and the carrier identification code of the customer's IXC among the categories of information that must be provided to the IXC by the LEC. The Commission concludes that knowing the effective date of account changes will help IXCs to maintain accurate customer account information and that including the carrier identification code of the customer's IXC will enable an IXC to verify that it is the proper recipient of the transmitted information.

Paragraph 64.4002(g) of the Commission's rules is modified to make the information categories included in paragraph 64.4002(g) consistent with those included in other LEC notification requirements. Paragraph 64.4002(g) also is modified to require that when a customer changes LECs, but wishes to retain his current PIC, the new LEC must so notify the current PIC so that the current PIC does not erroneously assume, absent additional notification from the new LEC, that the customer also wishes to cancel his current PIC.
