#### Regulatory Flexibility Act Certification

I certify that the following action will  
not have a significant impact on a  
substantial number of small entities.  
The major factors considered for this  
certification were:

1. The action will not result in any  
additional reporting, recordkeeping or  
other compliance requirements for small  
entities other than the small  
organizations that will furnish the  
products and services to the  
Government.

2. The action will result in  
authorizing small entities to furnish the  
products and services to the  
Government.

3. There are no known regulatory  
alternatives which would accomplish  
the objectives of the Javits-Wagner-  
O'Day Act (41 U.S.C. 8501-8506) in  
connection with the products and  
services proposed for addition to the  
Procurement List.

## DEPARTMENT OF DEFENSE

### Department of the Army

#### Final Environmental Impact Statement for the Construction and Operation of an Infantry Platoon Battle Course at Pōhakuloa Training Area, Hawai'i

**AGENCY:** Department of the Army, DoD.

**ACTION:** Notice of availability.

**SUMMARY:** The U.S. Army Pacific  
(USARPAC) and U.S. Army Garrison,  
Hawai'i, (USAG–HI) propose to  
construct and operate a modern Infantry  
Platoon Battle Course (IPBC) and  
associated infrastructure that is  
compliant with current Army training  
requirements at Pōhakuloa Training

Area (PTA), Hawai'i. The proposed  
IPBC would support the live-fire  
collective training needs of the Army,  
Army Reserve, and Hawai'i Army  
National Guard, as well as other Service  
components that are stationed or train  
in Hawai'i.

Two alternatives were analyzed in the  
EIS: the Western Range Area Alternative  
(preferred) and the Charlie Circle  
Alternative. Both proposed IPBC  
alternative locations are in under-  
utilized portions of the PTA impact area  
where no ranges currently exist. These  
locations have been exposed to indirect  
munitions fire, and the proposed action  
would reclaim portions of the impact  
area to construct the IPBC. A third  
alternative analyzed in the Draft  
Programmatic Environmental Impact  
Statement (PEIS), Southwest of Range  
20, is not operationally feasible and has  
been eliminated from the Final EIS. The  
Army also considered a No Action  
Alternative to not build the IPBC. For all  
alternatives (except for the No Action),  
the IPBC would be used for 242 training  
days per year.

The Army identified and analyzed  
environmental and socioeconomic  
impacts associated with the proposed  
IPBC. The major potential  
environmental impacts are to air  
quality, cultural sites, threatened and  
endangered species, encountering  
munitions and explosives of concern,  
and igniting wildfires. Cultural  
resources could also be significantly  
impacted. The Army consulted with the  
USFWS on potential mitigation  
measures to protect federally-listed  
species. The USFWS issued a Biological  
Opinion (BO) pursuant to Section 7 of  
the Endangered Species Act on January  
11, 2013. The Army also consulted with  
the State Historic Preservation Division,  
Advisory Council on Historic  
Preservation, and other consulting  
parties, including Native Hawaiian  
organizations, about potential effects on  
cultural resources and mitigation of  
those effects. The Army and the  
consulting parties are in the process of  
signing a Programmatic Agreement (PA)  
pursuant to Section 106 of the National  
Historic Preservation Act. The PA  
establishes how the remaining steps to  
the Section 106 consultation will be  
completed and the mitigation measures  
for the potential adverse effects on  
cultural resources. The PA will be  
signed prior to the Army issuing a  
Record of Decision for the proposed  
action.

**DATES:** The waiting period for the Final  
EIS will end 30 days after publication of  
the NOA in the **Federal Register** by the  
U.S. Environmental Protection Agency.
