**SUPPLEMENTARY INFORMATION:** The Administrator of GSA established the GAP FAC as a discretionary advisory committee under agency authority in accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. app 2). As America's buyer, GSA is uniquely positioned to enable a modern, accessible, and streamlined acquisition ecosystem and a robust marketplace connecting buyers to the suppliers and businesses that meet their mission needs. The GAP FAC will assist GSA in this endeavor through expert advice on a broad range of innovative solutions to acquisition policy, workforce, and industry partnership challenges.

The GAP FAC will serve as an advisory body to GSA's Administrator on how GSA can use its acquisition tools and authorities to target the highest priority Federal acquisition challenges. The GAP FAC will advise GSA's Administrator on emerging acquisition issues, challenges, and opportunities to support its role as America's buyer. The initial focus for the GAP FAC will be on driving regulatory, policy, and process changes required to embed climate and sustainability considerations in Federal acquisition. This includes examining and recommending steps GSA can take to support its workforce and industry partners in ensuring climate and sustainability issues are fully considered in the acquisition process. To accomplish its work, the GAP FAC established three subcommittees: Policy and Practices, Industry Partnerships, and Acquisition Workforce.

The Policy and Practice Subcommittee will focus on procurement policy that supports robust climate and sustainability action. This group will focus on regulatory, policy, and process changes required to embed climate and sustainability considerations in Federal acquisitions.

The Industry Partnerships Subcommittee will investigate ways to expand a climate focus on Federal acquisition while reinforcing inclusion, domestic sourcing, small business opportunity, and innovation from an Industry standpoint. This includes identifying and addressing gaps in sustainable attributes standards for the goods and services that the Federal government buys.

The Acquisition Workforce Subcommittee will explore ways to advance a culture of sustainability and climate action within the acquisition workforce. This includes equipping and enabling the acquisition workforce to effectively use sustainability as a critical

element in the evaluation and source selection process.
