SUPPLEMENTARY INFORMATION: On June 28, 2010 (75 FR 36700), the NRC published a notice of issuance and availability of Draft Regulatory Guide DG-1216, "Plant-Specific Applicability of Transition Break Size Specified in 10 CFR 50.46a." By letter dated July 13, 2010, the Nuclear Energy Institute (ADAMS Accession No. ML102070019) requested an extension of the stated comment period for the purpose of gathering input from personnel with varied technical expertise. It is the desire of the NRC to receive comments of a high quality from all stakeholders. Several factors have been considered in granting an extension. 10 CFR 50.46a will be an optional regulation for licensees, the requested comment period extension is within the rulemaking period, and the rule encompasses complex technical bases. Therefore the comment submittal period is extended from the original date of August 25, 2010 to November 8, 2010.

Dated at Rockville, Maryland, this 26th day of July, 2010.

Acting Chief, Regulatory Guide Development Branch, Division of Engineering, Office of Nuclear Regulatory Research.
