

## Conclusion

This action affects only a certain novel or unusual design feature on the Leonardo Model AW139 helicopter. It is not a rule of general applicability and affects only the applicant who applied to the FAA for approval of this feature on the helicopter.

## List of Subjects in 14 CFR Part 29

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

## Authority Citation

The authority citation for these special conditions is as follows:

**Authority:** 49 U.S.C. 106(f), 106(g), 40113, 44701–44702, 44704.

## The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for the Leonardo S.p.a. Model AW139 helicopter, as modified by The Boeing Company.

(a) The Rotorcraft Flight Manual must state the following:

(1) Use of the 2.5-minute Hovering Out of Ground Effect (HOGE) Utility Power (2.5-minute HUP) is limited to a period no longer than 2.5 minutes each, under all engine operating (AEO) conditions, at helicopter operating speeds below 60 knots indicated airspeed (KIAS) and HOGE.

(2) Use of the 2.5-minute HUP is not part of, or combined with, a takeoff operation.

(b) In addition to the requirements of § 29.49(c), the out-of-ground effect hover performance must be determined over the ranges of weight, altitude, and temperatures for which certification is requested with the 2.5-minute HUP.

(c) In addition to the requirements of § 29.923(d) when performing the endurance test, the 2.5 minute all engines operating must be performed using two applications of 2.5-minute HUP torque and the maximum speed for use with 2.5-minute HUP torque, per 10-hour cycle.

(d) In addition to the requirements of § 29.1049, the hovering cooling provisions at the 2.5-minute HUP must be shown as follows—

(1) Conduct a thermal stabilization at maximum weight, mission representative power, maximum altitude, and ambient temperatures specified in § 29.1043(b); following stabilization, increase power to the 2.5-minute HUP and HOGE for a duration of 2.5 minutes (150 seconds).

(2) Cycle in and out the HUP mode in a manner representative of the intended

use of the 2.5-minute HUP, and per the instructions specified in the Rotorcraft Flight Manual, if any. The HUP cycles should account for repeated successive HUP applications and time duration between HUP cycles resulting in the most critical condition for the cooling provisions required by § 29.1041(a) and (b).

(3) Following the tests in paragraphs (d)(1) and (2) of these special conditions, depart the hover and transition to a maximum continuous power climb at the best rate of climb speed. Continue the climb until 5 minutes after the highest temperatures are observed or until the service ceiling is reached.

(e) In addition to the requirements of § 29.1305, the pilot must have the means to identify the 2.5-minute HUP time limit associated with its use as follows—

- (1) When the power level is achieved,
- (2) when the event begins, and
- (3) when the time interval expires.

These indications must be clear and unambiguous to the pilot and must not cause pilot confusion. The use of these indications must be evaluated in operationally relevant scenarios in accordance with § 29.1523 for crew workload.

(f) In addition to the requirements of § 29.1521, the use of the 2.5-minute HUP must be limited by the following:

- (1) The maximum rotational speed, which may not be greater than—
  - (i) The maximum value determined by the rotor design, or
  - (ii) The maximum value demonstrated during the type tests.
- (2) The maximum allowable turbine inlet or turbine outlet gas temperature (for turbine engines).

(3) The maximum allowable power or torque for each engine, considering the power input limitations of the transmission with all engines operating.

(4) The maximum allowable power or torque for each engine considering the power input limitations of the transmission with one engine inoperative;

(5) The time limit for the use of the power corresponding to the limitations established in paragraphs (f)(1) through (4) of these special conditions.

(6) The maximum allowable engine and transmission oil temperatures, if the time limit established in paragraph (f)(5) of these special conditions exceeds 2 minutes.

(7) Use of 2.5-minute HUP is limited to HOGE only.

(g) In addition to the requirements of § 29.1587(b)(8), the Rotorcraft Flight Manual must contain the out-of-ground effect hover performance determined

under paragraph (b) of these special conditions, and the maximum safe wind demonstrated under the ambient conditions for the data presented. In addition, the Rotorcraft Flight Manual must include the maximum weight for each altitude and temperature condition at which the rotorcraft can safely hover out-of-ground-effect in winds not less than 17 knots from all azimuths. These data must be clearly referenced to the appropriate hover charts and specify that they are not to be used for take-off or landing determinations.

Issued in Kansas City, Missouri, on April 28, 2022.

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

### 33 CFR Part 117

[Docket No. USCG–2022–0222]

RIN 1625–AA09

### Drawbridge Operation Regulation; Okeechobee Waterway, Stuart, FL

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notification of inquiry, request for comments.

**SUMMARY:** The Coast Guard is seeking information and comments on a proposed change to the operating regulations for the Florida East Coast (FEC) Railroad Bridge, mile 7.4, and the SR 707 (Dixie Hwy) Bridge, mile 7.5, across the Okeechobee Waterway (OWW), at Stuart, Florida. In anticipation of passenger rail service across the FEC Railroad Bridge, the Coast Guard intends to propose a change that will allow the drawbridge to operate on a more predictable schedule. The Coast Guard intends to propose a similar operating schedule for the adjacent SR 707 (Dixie Hwy) Bridge. We invite your comments on this proposed rulemaking.

**DATES:** Comments and related material must reach the Coast Guard on or before July 5, 2022.

**ADDRESSES:** You may submit comments identified by docket number USCG–2022–0222 using Federal Decision Making Portal at <https://www.regulations.gov>.

See the “Public Participation and Request for Comments” portion of the

**SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this notice, call or email Ms. Jennifer Zercher, Bridge Management Specialist, Seventh Coast Guard District, telephone 305-415-6740, email [Jennifer.N.Zercher@uscg.mil](mailto:Jennifer.N.Zercher@uscg.mil).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Table of Abbreviations**

CFR Code of Federal Regulations  
DHS Department of Homeland Security  
E.O. Executive Order  
FR Federal Register  
§ Section Symbol  
U.S.C. United States Code  
FEC Florida East Coast  
SR State Route  
WAMS Waterways Analysis and Management System  
OWW Okeechobee Waterway  
HWY Highway

##### **II. Background, Purpose and Purpose**

The FEC Railroad Bridge across the OWW, mile 7.4, at Stuart, Florida is a single-leaf bascule railroad bridge with a six-foot vertical clearance at mean high water in the closed position. The normal operating schedule for the bridge is found in 33 CFR 117.317(c).

The SR 707 (Dixie Hwy) Bridge across the OWW, mile 7.5, at Stuart, Florida is a double-leaf bascule bridge with a 14-foot vertical clearance at mean high water in the closed position. The normal operating schedule for the bridge is found in 33 CFR 117.317(d). Navigation on the waterway is commercial and recreational.

In response to All Aboard Florida Railway's (Brightline) expansion project development and environmental study, U.S. Coast Guard Sector Miami Waterways Management Office conducted a Waterways Analysis and Management System (WAMS) review of the Intracoastal Waterway from miles 925-1005 in 2018. The WAMS included a focused review of the railroad bridges over the St Lucie River (OWW) and Loxahatchee River. The WAMS concluded that, with the addition of passenger rail service, the FEC Railroad Bridge over the OWW would create an unreasonable obstruction to navigation if operated under the current regulation, 33 CFR 117.317(c). U.S. Coast Guard Captain of the Port Miami, based on the WAMS, recommended the regulation for the railroad bridge be changed to allow for reasonable usage of competing modes of transportation and provide a predictable opening schedule.

##### **III. Information Requested**

To aid us in further developing a proposed rule, we seek responses from waterway users to the following questions:

- (1) Do you currently transit through the FEC Railroad Bridge crossing the Okeechobee Waterway, mile 7.4, at Stuart, Florida?
- (2) How often do you transit this waterway?
- (3) If railway traffic impedes your navigation of this area, how long are you normally delayed?
- (4) How would you propose to regulate the balance of railway and maritime traffic in this area?
- (5) What challenges have you experienced when transiting this area due to these bridges and/or railway activity?
- (6) Is a 15 minute hourly opening schedule sufficient for marine traffic? If not, please explain why.
- (7) Should the SR 707 (Dixie Hwy) Bridge opening schedule mirror the operating schedule of the FEC Railroad Bridge?

##### **IV. Public Participation and Request for Comments**

We encourage you to submit comments in response to this notice of inquiry through the Federal Decision Making Portal at <https://www.regulations.gov>. To do so, go to <https://www.regulations.gov>, type USCG-2022-0222 in the search box and click "Search." Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. In your submission, please include the docket number for this notice of inquiry and provide a reason for each suggestion or recommendation. If your material cannot be submitted using <https://www.regulations.gov> contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select "Supporting & Related Material" in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the <https://www.regulations.gov> Frequently Asked Questions web page. We review all comments received, but we may choose not to post off-topic, inappropriate, or duplicate comments that we receive. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

We accept anonymous comments. Comments we post to <https://www.regulations.gov> will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

We may hold a public meeting, if necessary, to receive oral comments on this Notice of Inquiry and will announce the date, time, and location in a separate document published in the **Federal Register**. If you signed up for docket email alerts mentioned in the paragraph above, you will receive an email notice when the public meeting notice is published and placed in the docket.

This document is issued under authority of 5 U.S.C. 552(a); 33 U.S.C. 499.

Dated: April 22, 2022.

**Brendan C. McPherson,**  
Rear Admiral, U.S. Coast Guard, Commander  
Coast Guard Seventh District.
