DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2016-0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below.

The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM

and FIS report are used by insurance agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

DATES: The effective date of May 2, 2017 which has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at www.msc.fema.gov by the effective date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Map Information eXchange (FMIX) online at www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified

flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at www.msc.fema.gov.

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Understanding Rapid Re-Housing Study.

OMB Approval Number: Pending.

Type of Request: New.

Form Number: No forms.

Description of the need for the information and proposed use: Rapid Re-Housing (RRH) is an increasingly popular approach for using the homeless assistance system to reduce and end homelessness in communities across the United States. Several studies have examined RRH program outcomes. HUD's *Rapid Re-Housing for Homeless Families Demonstration Program* report¹ and the U.S. Department of Veterans Affairs' research brief *Impact and Performance of the Supportive Services for Veteran Families (SSVF) Program: Results from the FY 2013 Program Year*² measured RRH outcomes, and RRH was one of the active interventions tested in the Family Options Study (FOS).³ Several local studies have also assessed RRH. Collectively, the research conducted to date has produced varied evidence of the outcomes for participants receiving this type of assistance.

The *Understanding Rapid Re-Housing Study* provides an opportunity to (1) synthesize existing research on RRH programs, (2) extend the analysis of data from the Family Options Study (2016), (3) provide a detailed examination of all rapid re-housing programs nationwide, and (4) conduct qualitative research with a small sample of families and individuals who receive RRH. The first two objectives will utilize existing literature and data that have already been collected. To examine the nation's RRH programs, we will rely on currently existing Annual Program Reports (APRs) from local Continuums of Care (CoCs) and administer a web-based survey to RRH programs. To accomplish the fourth objective, we will conduct in-depth interviews and ethnographic research with households.

This notice announces HUD's intent to collect information through the following methods: Study investigators (from Abt Associates) will administer a program-level web-based survey, which

will include two separate sets of questions—a short set of system-level questions for CoC program staff, and an in-depth set of questions for RRH program staff. The survey will be administered to all CoCs and RRH programs nationwide. To describe the program models in place, the use of progressive engagement, and strategies for RRH in tight rental markets, the study investigators will conduct in-depth telephone follow-up interviews with approximately 20 RRH programs. In addition, investigators will conduct one-time in-person in-depth interviews with a sample of six households in shelter who have been offered RRH but have not yet started to receive it, 16 households who are receiving RRH assistance, and six households that have already transitioned from RRH to permanent housing. Finally, to understand their experiences both during RRH and once RRH assistance ends, investigators will conduct ethnographic research with 16 households. This will include in-person interviews, household observations, quarterly check-ins, and the completion of housing journals.

Respondents: Information collection for the program-level web survey will involve program staff from all CoCs (approximately 400) and all RRH programs nationwide (approximately 2,400 programs). Approximately 20 RRH programs will be involved in the in-depth follow-up interviews. Information collection for the qualitative research will affect approximately 28 households.

From the completed 28 interviews, study investigators will invite all 16 households receiving RRH to continue in the applied ethnographic component of the study (and we assume that 15 will complete the ethnographic research activities). Their one-time in-depth interviews will provide a baseline against which investigators will analyze data to be collected over the subsequent 15 months. Those data will include participant observation, housing journals, quarterly family updates, and two follow-up interviews.

Members of Affected Public: Continuum of Care Collaborative Applicants, rapid re-housing program directors, and participants of rapid re-housing programs.

Estimated Number of Respondents: Web-based program survey (CoCs)—400; web-based program survey (RRH programs)—2,400; RRH in-depth telephone program interviews—20; one time RRH program participant
