Although non-emergency issues not
contained in the meeting agenda may be
discussed, those issues may not be the

subject of formal action during this
meeting. Action will be restricted to
those issues specifically listed in this
document and any issues arising after
publication of this document that
require emergency action under section
305(c) of the Magnuson-Stevens Fishery
Conservation and Management Act,
provided the public has been notified of
the intent to take final action to address
the emergency.

I. Transmittal

BILLING CODE 6001-FR-C

Transmittal No. 24-0B

*REPORT OF ENHANCEMENT OR
UPGRADE OF SENSITIVITY OF
TECHNOLOGY OR CAPABILITY (SEC.
36(B)(5)(C), AECA)*

(i) *Purchaser:* Government of the
United Kingdom

(ii) *Sec. 36(b)(1), AECA Transmittal
No.:* 18-40

Date: October 19, 2018

Implementing Agency: Army

(iii) *Description:* On October 19, 2018, Congress was notified by Congressional certification transmittal number 18-40 of the possible sale, under Section 36(b)(1) of the Arms Export Control Act, of sixteen (16) H-47 Chinook (Extended Range) helicopters; thirty-six (36) T-55-GA-714A engines (32 installed, 4

spares); forty-eight (48) embedded GPS inertial navigation units (32 installed, 16 spares); twenty (20) common missile warning systems (16 installed, 4 spares); twenty-two (22) radio-frequency countermeasures (16 installed, 6 spares); nineteen (19) multi-mode radars (16 installed, 3 spares); nineteen (19) electro-optical sensor systems (16 installed, 3 spares); forty (40) M-134D-T miniguns, plus mounts and tools (32 installed, 8 spares); and forty (40) M240H machine guns, plus mounts and tools (32 installed, 8 spares). Also included was communications equipment; navigation equipment; aircraft survivability equipment; initial training equipment and services; synthetic training equipment; support package including spares and repair parts; special tools and test equipment;

aviation ground support equipment; safety and air worthiness certification; technical support; maintenance support; technical and aircrew publications; mission planning system equipment and support; project management and governance; United States (U.S.) Government and contractor engineering and logistics support services; and other related elements of logistics and program support. The total estimated program cost was \$3.5 billion. Major Defense Equipment (MDE) constituted \$1.655 billion of this total.

This transmittal notifies the addition of the following MDE items:

- Seventeen (17) Common Infrared Countermeasure (CIRCM) Systems
- Seventeen (17) Limited Missile Warning Receiver Systems (LIMWS)

—Seventeen (17) Degraded Visual Environment Pilotage Systems (DVEPS)

Also included are Man-Portable Night Vision Devices. The estimated total value of these new items is \$162 million, but their addition will not cause an increase in the total case value. The estimated total case value will remain at \$3.5 billion. Major Defense Equipment (MDE) will remain at \$1.655 billion of this total.

(iv) *Significance*: The proposed sale will enhance the United Kingdom's capabilities to provide national defense and contribute to NATO and coalition operations.

(v) *Justification*: This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

(vi) *Sensitivity of Technology*: CIRCUM is the next-generation lightweight, laser-based, infrared countermeasure system for rotary-wing, tiltrotor, and small fixed-wing aircraft across the DoD. CIRCUM provides near-spherical coverage of the host platform to defeat infrared (IR)-seeking threat missiles. CIRCUM receives an angular bearing hand-off from the Missile Warning System (Common Missile Warning System (CMWS) or LIMWS) and employs a pointing and tracking system that acquires and tracks the incoming missile. CIRCUM jams the missile by using modulated laser energy, thus degrading the tracking capability of the missile and causing it to miss the aircraft.

LIMWS will protect aircraft from missiles by deploying flares and by cueing laser-based countermeasure systems such as the CIRCUM. The LIMWS A-kit is backwards compatible with CMWS. LIMWS maintains overmatch of quickly emerging threat technology and tactics by providing increased detection range, improved detection in clutter, and more agile algorithms to rapidly respond to emerging Man-Portable Air Defense Systems (MANPADS) threats. LIMWS utilizes IR-based sensors to detect incoming missiles and unguided hostile fire, fiber optic cables for high-speed data transmission from the sensors to the system processor and implements machine learning algorithms.

DVEPS provides overmatch by providing increased situational awareness to the aircrew in Degraded Visual Environment (DVE) conditions such as brownout, allowing Special Operations Aviation assets to execute missions in almost any environmental

condition. DVEPS utilizes using three-dimensional (3D) imaging technology. DVEPS produces imagery, 3D conformal symbology, and system alerts to aid pilots in maintaining spatial awareness during and after transition from visual meteorological conditions (VMC) to DVE conditions. DVEPS includes a synthetic vision avionics backbone (SVAB), light detection and ranging (LiDAR), removable storage device, infrared camera, power distribution unit, and inertial measurement unit.

The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

(vii) *Date Report Delivered to Congress*: March 12, 2024
