

The automated reporting system is known as ETA's Enterprise Business Support System (EBSS) Tax Credit Reporting System (TCRS). EBSS/TCRS is a Web-based system that allows states to meet the reporting responsibilities in a more efficient manner while reducing the reporting burden on the state, regional, and national levels. Through this system, states can manually enter or

electronically upload the required quarterly data report (ETA Form 9058). This electronic reporting system reduced burden hours by 78 percent from 3,215,368 annual burden hours estimated for these forms in the 2002 ICR to 703,125 actual burden hours in 2004. The present ICR reflects the substantial decrease in response time for these forms.

Type of Review: Three-Year Extension (without change).

DEPARTMENT OF LABOR

Employment and Training Administration

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995

(PRA95) [44 U.S.C. 3506(c)(2)(A)]. Key workload data on the Trade Adjustment Assistance (TAA) program are needed to allocate program and administrative funds to State agencies administering the program for the Secretary. This revision to the ETA-563 and ETA-9027 (1205-0016 expires May 31, 2006) eliminates non-essential data elements or duplication of data collected elsewhere, and simplifies the reporting process.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

This is a notice of proposed revision of collection of information currently approved by OMB (ETA-563 and ETA-9027, 1205-0016 expires May 31, 2006). This revision of the ETA-563 reduces the burden hours and eliminates data

elements duplicated in other data collections. The changes to the ETA-9027 eliminate outdated data elements.
