Title of Collection: Survey of Graduate Students and Postdoctorates in Science and Engineering.

OMB Control Number: 3145-0062.

Summary of Collection: The Survey of Graduate Students and Postdoctorates in Science and Engineering (GSS), sponsored by the NCSES within NSF and the National Institutes of Health, is designed to comply with legislative mandates by providing information on the characteristics of academic graduate enrollments in science, engineering and health fields. This request to extend the information collection for three years is to cover the 2020, 2021, and 2022 GSS survey cycles. The information collected by the GSS is solicited under the authority of the National Science Foundation Act of 1950, as amended and the America COMPETES Reauthorization Act of 2010. Data collection starts each fall in October and data are obtained primarily through a Web survey. Data are disseminated annually. All information will be used for statistical purposes only. Participation in the survey is voluntary.

To improve coverage of postdocs, the GSS periodically collects information on postdocs employed in Federally Funded Research and Development Centers (FFRDCs). This survey of postdocs at FFRDCs will be conducted as part of the 2021 GSS survey cycle.

Additional details regarding this survey are provided in an earlier **Federal Register** Notice, at 85 FR 19169.

Use of the Information: The GSS data are routinely provided to Congress, other parts of NSF, other Federal agencies, the GSS institutions themselves, and several professional societies. In addition, the National Institutes of Health (NIH) publish GSS data annually in the NIH Data Book <https://report.nih.gov/nihdatabook/>.

Expected Respondents: The GSS is an annual census of all eligible academic institutions in the U.S. with graduate programs in science, engineering, and health fields. The response rate is calculated based on the number of reporting units (departments, programs, research centers, and health care facilities) that respond to the survey. For reference, in 2018, the GSS population was 19,592 units at 715 academic institutions. Based on recent cycles NCSES expects the annual response rate to be around 99 percent.

Estimate of Burden: The total estimated respondent burden of the GSS, including 1,000 hours for potential methodological studies to improve the survey procedures, will be 56,480 hours over the three-cycle survey clearance period. NCSES may review and revise this burden estimate based on
