If consignments of the above fruits are not precleared, the consignment will need to be accompanied by a phytosanitary certificate issued by the National Plant Protection Organization (NPPO) of New Zealand.

Additionally, consignments of citrus (*Citrus* spp) and persimmon (*Diospyros kaki*) fruit must be accompanied by a phytosanitary certificate issued by the NPPO of New Zealand with an additional declaration stating the fruit is free of *Cnephasia jactatana*, *Coscinoptycha improbana*, *Ctenopseustis obliquana*, *Pezothrips kellyanus*, and *Planotortrix excessana*.

We solicited comments on the notice for 60 days ending January 24, 2025. We received two comments by that date, one from a New Zealand industry organization and one from a New Zealand government ministry. Both commenters expressed support for the notice. One commenter, from the government ministry, requested assurances that, upon arrival, inspections of non-precleared consignments will be commensurate with risk, and that the higher sampling rates specific for LBAM host commodities are removed from the inspection manual.

We note that no port-of-entry inspection procedures target LBAM specifically. Rather, the inspection procedures employed on fruits and vegetables from New Zealand match those for agricultural commodities from numerous other countries and have been developed to detect quarantine pests as well as hitchhikers, weeds, and soil. After the deregulation of LBAM, the inspection procedures at the port of entry will remain the same for the listed agricultural commodities from New Zealand if they have not been pre-cleared in the country of origin.

Therefore, in accordance with the regulations in § 319.56–4(c), we are announcing our decision to deregulate LBAM for fruit imported from New Zealand into the United States subject to the phytosanitary measures identified in the CIED that accompanied the initial notice.

The conditions will be listed in the ACIR database. In addition to these

specific measures, fruit from New Zealand will be subject to the general requirements listed in § 319.56–3 that are applicable to the importation of all fruits and vegetables.

#### SUPPLEMENTARY INFORMATION:

**Title:** Importation of Poultry Meat and Other Poultry Products From Sinaloa and Sonora, Mexico; Poultry and Pork Transiting the United States.

**OMB Control Number:** 0579–0144.

**Type of Request:** Revision to and extension of approval of an information collection.

**Abstract:** The Animal Health Protection Act is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The Secretary may also prohibit or restrict the import or export of any animal or related material if necessary to prevent the spread of any livestock or poultry pest or disease.

Disease prevention is the most effective method for maintaining a healthy animal population and for enhancing the U.S. Department of Agriculture's Animal and Plant Health Inspection Service's (APHIS') ability to allow U.S. animal producers to compete

in the world market of animal and animal product trade. APHIS is the agency charged with carrying out disease prevention by regulating the importation of animals and animal products into the United States. The regulations under which APHIS conducts these disease prevention activities are contained in 9 CFR parts 91 through 99. These regulations govern the importation of animals and animal products.

APHIS currently places certain restrictions on the importation and in-transit movement of fresh (chilled or frozen) pork and pork products from Mexico because of the presence of classical swine fever (CSF) in some areas of Mexico. However, the regulations in § 94.15 allow pork and pork products from certain Mexican States to transit the United States, under seal, for export to another country.

In addition, the regulations in § 94.6 provide the requirements for, among other things, the importation of poultry carcasses, parts, products, and eggs (other than hatching eggs) from regions where Newcastle disease (ND) is considered to exist. However, § 94.15 also allows poultry carcasses, parts, products, and eggs (other than hatching eggs) that do not qualify for entry into the United States to transit the United States via land ports, for immediate export, from Mexican States that Mexico considers to be free of ND.

APHIS believes that allowing such in-transit movements presents a negligible risk of introducing CSF or ND into the United States while simultaneously avoiding unnecessary restrictions on trade.

APHIS also currently has regulations in place that restrict the importation of poultry meat and other poultry products from Mexico due to the presence of ND in that country. However, under the regulations in § 94.30, APHIS allows the importation of poultry meat and poultry products from the Mexican States of Sinaloa and Sonora, if imported according to APHIS' requirements, because APHIS has determined that poultry meat and products from these two Mexican States pose a negligible risk of introducing ND into the United States.

To ensure these commodities are safe for importation, APHIS requires that certain information collection activities take place such as foreign meat inspection certificates, serially numbered seals, emergency action notification, and pre-arrival notifications.

We are asking OMB to approve our use of these information collection

activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

*Estimate of burden:* The public burden for this collection of information is estimated to average .999 hours per response.

*Respondents:* Federal animal health authorities in Mexico and U.S. importers and exporters of poultry meat, other poultry products, pork, and pork products from Mexico.

*Estimated annual number of respondents:* 69.

*Estimated annual number of responses per respondent:* 30.

*Estimated annual number of responses:* 2,097.

*Estimated total annual burden on respondents:* 2,095 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 21st day of July 2025.
