The draft was available at the First Ladies National Historic Site, on the Internet, and at area libraries. A total of four written comments were received, and five participants attended two open houses. The consensus from the public comment period is that the correct path to pursue for future management of the First Ladies National Historic Site is the preferred alternative, Alternative B. Comments from individuals and public agencies did not require the addition of other alternatives, significantly alter existing alternatives, or make changes to the impact analysis of the effects of any alternative.

Dated: February 16, 2006.
