

Title of the Collection: SF-428 Tangible Personal Property Report.
Type of Collection: Reinstatement of an expired information collection.
OMB No.: 4040-0018.

Abstract: Reporting on the status of Federally-owned property, including disposition, is necessitated in 2 CFR part 215, the "Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations", and the "Uniform Administrative Requirements for Grants and Agreements with State and Local Governments", Additionally, Public

Law 106-107, the Federal Financial Assistance Management Improvement Act requires that agencies "simplify Federal financial assistance application and reporting requirements." 31 U.S.C. 6101, Section 3.

Agencies are currently using a variety of forms to account for both Federally-owned and grantee owned equipment and property. During the public consultation process mandated by Public Law 106-107, grant recipients requested a standard form to help them submit appropriate property information when required. The Public

Law 106-107 Post Awards Subgroup developed a new standard form, the Tangible Personal Property Report, for submission of the required data. The form consists of the cover sheet (SF-428), three attachments to be used as required: Annual Report, SF-428-A; Final Report, SF-428-B; Disposition Request/Report, SF-428-C and a Supplemental Sheet, SF-428S to provide detailed individual item information when required.

Changes shall be made to the form and instructions of the SF-428-B and the SF-428-C.

ANNUALIZED BURDEN HOUR TABLE

Forms	Respondents (if necessary)	Number of respondents	Number of responses per respondents	Average burden per response	Total burden hours
SF-428 Tangible Personal Property Report.	Grant applicants	2,000	1	1	2,000
Total	2,000	1	1	2,000

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT:

Amy F. Petrik, Ph.D., 240-627-3721; amy.petrik@nih.gov. Licensing information and copies of the U.S. patent application listed below may be obtained by communicating with the indicated licensing contact at the Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases, 5601 Fishers Lane, Rockville, MD 20852; tel.

301-496-2644. A signed Confidential Disclosure Agreement will be required to receive copies of unpublished patent applications.

SUPPLEMENTARY INFORMATION:

Technology description follows:

Newcastle Disease Virus-Like Particle Displaying Prefusion Stabilized SARS-CoV-2 Spike and Its Use

Description of Technology:

SARS-CoV-2 has resulted in a global pandemic, sparking urgent vaccine development efforts. The trimeric SARS-CoV-2 spike stabilized in its prefusion conformation by the addition of 2 proline mutations ("SARS-CoV-2 S2P") is the antigenic basis of SARS-CoV-2 vaccines that are currently authorized for use in the United States. Researchers at the Vaccine Research Center (VRC) of the National Institute of Allergy and Infectious Diseases (NIAID) sought to optimize the presentation of SARS-CoV-2 S2P to the immune system with the goal of eliciting a strong and durable immune response. The researchers designed fusion proteins made of SARS-CoV-2 S2P and Newcastle Disease fusion transmembrane domain and cytosolic tail which form virus like particles (VLPs) displaying the SARS-CoV-2 S2P on the particle surface.

SARS-CoV-2 S2P displaying Newcastle Disease virus-like particles ("S2P-NDVLP") elicited a robust immune response two weeks after a single immunization. The S2P-NDVLP also elicited an improved immunogenicity despite delivering a

lower number of SARS-CoV-2 S2P antigens than the soluble SARS-CoV-2 S2P to which they were compared. This improved immunogenicity is likely due to several characteristics of S2P-NDVLPs such as the mass and large size of the VLP particle that can result in a strong immune response and increase uptake of the S2P by dendritic cells. Displaying multiple SARS-CoV-2 S2P on a single particle could allow multiple B-cell receptors on individual B cells to bind that single particle, thereby cross-linking the B-cell receptors and activating those B cells. Lastly, the lipid membrane of the S2P-NDVLP could allow the immunogen to more closely mimic the real virus and boost immune response.

This technology is available for licensing for commercial development in accordance with 35 U.S.C. 209 and 37 CFR part 404.

Potential Commercial Applications:

- A single dose SARS-CoV-2 vaccine

Competitive Advantages:

- S2P-NDVLP with potential to elicit higher levels of neutralizing antibodies than current vaccines with a single dose

Development Stage: Preclinical Research.

Inventors: Peter D. Kwong (NIAID); Yongping Yang (NIAID); Wei Shi (NIAID); John R. Mascola (NIAID); Olubukola Abiona (NIAID); Kizzmekia Corbett (NIAID); Barney Graham (NIAID).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Aging; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute on Aging Special Emphasis Panel; Alzheimer's Disease Drug Development.

Date: June 4, 2021.

Time: 12:00 p.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute on Aging, Gateway Building, 7201 Wisconsin Avenue, Bethesda, MD 20892 (Video Meeting).

Contact Person: Alexander Parsadonian, Ph.D., Scientific Review Officer, Scientific Review Branch, National Institute on Aging, National Institutes of Health, Gateway Building, 2C/212, 7201 Wisconsin Avenue, Bethesda, MD 20892, 301-496-9666, parsadonian@nia.nih.gov.

Name of Committee: National Institute on Aging Special Emphasis Panel; Mitochondria and Aging.

Date: June 14, 2021.

Time: 11:30 a.m. to 3:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute on Aging, Gateway Building, 7201 Wisconsin Avenue, Bethesda, MD 20892 (Video Meeting).

Contact Person: Bitu Nakhai, Ph.D., Scientific Review Officer, Scientific Review Branch, National Institute on Aging, National Institutes of Health, Gateway Bldg., 2C212, 7201 Wisconsin Avenue, Bethesda, MD 20892, 301-402-7701, nakhaib@nia.nih.gov.

Name of Committee: National Institute on Aging Special Emphasis Panel; Vascular Dysfunction in AD and Genetic Risk Factors. *Date:* June 15, 2021.

Time: 1:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute on Aging, Gateway Building, 7201 Wisconsin Avenue, Bethesda, MD 20892 (Video Meeting).

Contact Person: Alexander Parsadonian, Ph.D., Scientific Review Officer, Scientific Review Branch, National Institute on Aging, National Institutes of Health, Gateway Building, 2C/212, 7201 Wisconsin Avenue, Bethesda, MD 20892, 301-496-9666, parsadonian@nia.nih.gov.
