Section 90.545(c)(1) requires that public safety applicants select one of three ways to meet TV/DTV protection requirements: (1) Utilize geographic separation table in the rule; (2) submit an engineering study to justify other

separations; or (3) obtain concurrence from the applicable TV/DTV station(s). The engineering study is submitted to the Commission if the channel separation is other than what is stated in rule (table). Section 90.527 states that to prepare the regional plans for the 700 MHz band, the regional planning committees will require input from those entities within the regions that will be eligible to receive licenses under the plans. Entities that seek inclusion in the plan in order to obtain licenses will be third party respondents.

Section 90.1211 the Commission suggested that each 700 MHz region submit a plan on guidelines to be used for sharing the spectrum within the region.

The information will be submitted to the Commission and they will use the information obtained to assign licenses, and also use the information to determine regional spectrum requirements and to develop technical standards. The information will also be used to determine whether prospective licensees will operate in compliance with the Commission's rules. For information provide to, or exchanged among third parties, the data will be used to establish eligibility.
