

to authorized personnel. Following data collection, FMG will summarize the results and provide a final report along with the dataset to CPSC staff.

### B. Burden Hours

The proposed survey will take approximately 20 minutes to complete. We estimate the number of respondents to be 600. We estimate the total annual burden hours for respondents to be 200 hours. The monetized hourly cost is \$36.22, as defined by the average total hourly cost to employers for employee compensation for employees across all occupations as of June 2018, reported by the Bureau of Labor Statistics. The total cost burden is estimated to be \$7,244 (200 hours × \$36.22). The total cost to the federal government for the contract to design and conduct the proposed survey is \$210,112.

### C. Request for Comments

CPSC invites comments on these topics:

- Whether the proposed collection of information is necessary for the proper performance of CPSC's functions, including whether the information will have practical utility;
- The accuracy of CPSC's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
  - Ways to enhance the quality, utility, and clarity of the information to be collected; and
  - Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

**Abstract:** EDFacts is a U.S. Department of Education (ED) initiative, conducted by the National Center for Education Statistics (NCES), to collect, analyze, report on, and promote the use of high-quality, pre-kindergarten through grade 12 (pre-K-12) performance data for use in education planning, policymaking, and management and budget decision making to improve outcomes for students. By centralizing data provided by state education agencies about state level data, local education agencies, and schools, NCES uses the EDFacts data to report on students, schools, staff, services, and education outcomes at the state, district, and school levels. The centralized approach provides ED users with the ability to efficiently analyze and report on submitted data and has reduced the reporting burden for state and local data producers through the use of streamlined data collection, analysis, and reporting tools. EDFacts collects information on behalf of ED grant and program offices for approximately 150 data groups for all 50 states, Washington, DC, Puerto Rico, and seven outlying areas and freely associated states (American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Commonwealth of the Northern Mariana Islands, Republic of Palau, and the U.S. Virgin Islands), the Department of Defense Education Activity (DoDEA), and the Bureau of Indian Education (BIE). This request is to collect EDFacts data for the 2019-20, 2020-21, and 2021-22 school years. This collection package received public comments during a 60-day public comment period, which led to a number of revisions reflected in this request's documents, and is now being made available for the final, 30-day public comment period, after which further

revisions may be made accordingly. Due to overlap in the timing of data collection activities between consecutive years of the EDFacts collection, we are carrying over in this submission the approved SY 2018–19 data collection, which is scheduled to end in February 2020.

*Title of Collection:* Evaluation of  
Preschool Special Education Practices  
Efficacy Study.

*OMB Control Number:* 1850–0916.

*Type of Review:* A reinstatement of a  
previously approved information  
collection.

*Respondents/Affected Public:* State,  
Local, and Tribal Governments.

*Total Estimated Number of Annual  
Responses:* 1,739.

*Total Estimated Number of Annual  
Burden Hours:* 455.

*Abstract:* This package requests  
clearance for data collection activities to  
support an efficacy study of an  
instructional framework designed to  
address the needs of all preschool  
children in inclusive classrooms. The  
efficacy study is part of the Evaluation  
of Preschool Special Education Practices  
(EPSEP), which is assessing the  
feasibility of a large-scale effectiveness  
study of an intervention for preschool  
children in inclusive classrooms. The  
main objective of the efficacy study is to

test whether the Instructionally  
Enhanced Pyramid Model (IEPM) can be  
implemented with fidelity in inclusive  
preschool classrooms. IEPM is  
comprised of three established  
individual interventions for children  
with disabilities integrated together into  
a single comprehensive intervention for  
use with all children in inclusive  
preschool classrooms. The secondary  
objective is to provide initial evidence  
about IEPM's impacts on classroom and  
child outcomes. This efficacy study  
provides an important test of whether  
strategies for delivering content in a  
manner that meets the needs of each  
child with a disability can be integrated  
with an existing framework of teaching  
practices for inclusive preschool classes,  
thus helping all children participate and  
make progress in the general preschool  
curriculum. These strategies, which are  
called targeted instructional supports,  
have been tested separately but have not  
been tested as part of this framework.

The efficacy study will include data  
collection to conduct both  
implementation and impact analyses.  
The implementation analysis will use  
observation data to describe the fidelity  
of training and implementation. It also  
will draw on coaching logs and coach  
interviews to describe program  
implementation. In addition, responses  
to a teacher survey and teacher focus  
groups will provide information on  
teachers' backgrounds, professional  
experiences, and perspectives on IEPM  
implementation. The impact analysis  
will use data from observations of  
classroom inclusion quality and  
engagement, a child observation, a  
direct child assessment, and teacher  
reports on child outcomes. The  
implementation and impact analyses  
also will use district administrative  
records to offer additional contextual  
and background information on the  
preschool program, its teachers, and  
enrolled children. These various data  
collection activities will be carried out  
between summer 2019 and summer  
2021 during the two years that schools  
in the intervention group will  
implement IEPM (2019–2020 and 2020–  
2021 school years).
