Manti-La Sal National Forest Land and Resource Management Plan Revision

Manti-La Sal National Forest in Utah, Juab, Emery, Carbon, Sanpete, Grand, San Juan and Sevier counties in Utah, and Mesa and Montrose counties in Colorado.

AGENCY: Forest Service, USDA.

ACTION: Notice of Adjustment to **Federal Register** Notice Vol. 67, No. 86, p. 22397, May 3, 2002, and Vol. 69, No. 205, p. 62244, October 25, 2004, and transition to the 2005 Planning Rule at 36 CFR 219 (FR, Vol. 70, No. 3. / January 5, 2005, 1023).

SUMMARY: The Manti-La Sal National Forest (Forest) will exercise its option to adjust the land management plan revision process from compliance with the 1982 planning regulations, to conform to new planning regulations adopted in January 2005. This adjustment will have the following effects:

1. The 2005 Planning Rule redefines forest plans to be more strategic and flexible to better facilitate adaptive management and public collaboration.
2. The 2005 Planning Rule focuses more on the goals of ecological, social, and economic sustainability and less on prescriptive means of producing goods and services.

3. The Responsible Official who will approve the final plan will be the Forest Supervisor instead of the Regional Forester.

4. The Forest will establish an Environmental Management System (EMS) (per ISO 14001:2004(E)) prior to approval of the revised forest plan.

5. The emphasis of public involvement will be a collaborative effort between the public and the Forest Service to incorporate the most desirable management options into a single broadly supported management direction package that will become the forest plan.

6. Administrative review will change from a post-decision appeals process to a pre-decision objection process.

7. Because the Forest will not be preparing an Environmental Impact Statement (EIS) for revision of the forest plan, interim management strategies will be developed for the fourteen river segments identified as eligible for inclusion in the Wild and Scenic River (WSR) System. The suitability of these river segments for inclusion in the WSR System will be addressed in an appropriate environmental document after the revised forest plan is approved.

8. Because an environmental impact statement will not be prepared for this revision, oil and gas leasing decisions will not be made. Instead, the revised forest plan will include general guidelines for mineral operations, including oil and gas, which will be considered as appropriate for areas currently available for leasing to protect resource values while providing appropriate access for exploration and development activities. Decisions regarding areas administratively available for lease and lease stipulations will be addressed in a separate environmental document(s) prepared either concurrently with the revision process or following approval of the revised forest plan.

Public Involvement: Public participation and collaboration (including more than 34 public meetings) has been ongoing. Current information and details of public participation opportunities are posted on the Forest Web site at <http://www.fs.fed.us/r4/mantilasal/projects>. Contact Linda Crawley at (435) 636-3558, or e-mail lcrawley@fs.fed.us to be added to the forest plan revision mailing list.

ADDRESSES: Manti-La Sal National Forest, 599 W. Price River Dr., Price, UT 84501.
