SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for reinstatement with change of a previously approved information collection.

When creating a Request to Archive oceanographic data or information at the United States (U.S.) National Oceanographic Data Center (NODC), well-organized and complete metadata describing those data are needed for long term understanding and use of those data. The Send2NODC *web application* provides a web-based form for easily collecting required and optional descriptive metadata to describe oceanographic data in a way that supports Executive Order 12906 and structures those metadata to conform to the internationally used ISO 19115-2 Geospatial Metadata standard. Descriptive metadata informs the suitability of data for use by future data users and should provide critical context about how data were collected, what techniques and measurements were made, and data quality characterizations. Information about the data provider or other individuals is only used by NODC to contact the data provider with questions about submitted data, about the status of the data in the archival process, and to provide appropriate scientific recognition and attribution for submitted data. Send2NODC will be used by ocean scientists, principal investigators and their data managers.

II. Method of Collection

Respondents use the browser-based Send2NODC web application to provide information that was previously collected on a paper or electronic form. Using electronic File Transfer Protocol (FTP) to transfer digital files from the Data Provider to NODC are integrated into the Send2NODC web application, but the respondent may opt to send digital files to NODC using other media, such as on CD- or DVD-ROM discs or other media.
