

prevailing wages under the Davis-Bacon and Related Acts. The wage-data collection using the WD-10 form is a primary source of information and is essential to the determination of prevailing wages. The current WD-10 information collection, 1235-0015, has been approved by the Office of Management and Budget (OMB) and is currently approved for use through March 2024.

The Department is now proposing changes to the WD-10 form to improve the overall efficiency of the DBA survey process. The proposed changes aim to streamline the collection of data required for the survey and make the collection less burdensome for respondents. The revised WD-10 form, as proposed, contains questions and requests for information that are arranged in a manner that allows respondents to quickly gather and report information necessary for the Wage and Hour Division to properly determine and publish prevailing wage rates. For example, on the proposed WD-10 form, the respondent will no longer be asked to determine a peak week(s) of construction for reported projects, identify the project value, or identify contractors or subcontractors on the project. Additionally, the proposed form uses a "picklist" of labor classifications from which a respondent may choose, rather than requiring the respondent to manually enter the labor classification into an open text field. These proposed changes to the WD-10 form, among others, are designed to increase the ease of participating in a survey and solicit more usable wage data to issue more comprehensive wage determinations.

The Department also proposes to add a new WD-10A collection instrument, which will be a companion form to the WD-10 form. This collection instrument will be used pre-survey to identify potential respondents that performed construction work within the survey period in the survey area, which will enable the Department to solicit for survey participation. This pre-survey information requests will better identify additional contractors that performed construction work in the survey area. A complete listing of the proposed changes to the information collection is posted on the Department's website at: <https://www.dol.gov/agencies/whd/government-contracts/construction/surveys/wd10pra>.

**II. Review Focus:** The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information will have practical utility;

- Enhance the quality, utility, and clarity of the information to be collected;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

## SUPPLEMENTARY INFORMATION:

### I. Background

TMI-1 is a single unit Babcock & Wilcox Pressurized Water Reactor. CEG is the holder of Renewed Facility Operating License (RFOL) No. DPR-50 for TMI-1. On February 1, 2022, CEG notified the NRC that Exelon Generation Company, LLC (Exelon) officially changed its name to Constellation

Energy Generation, LLC. By letter dated June 20, 2017, per Section 50.82(a)(1)(i) of title 10 of the *Code of Federal Regulations* (10 CFR), Exelon certified to the NRC that it planned to permanently cease power operations at TMI-1 on or about September 30, 2019. TMI-1 subsequently permanently ceased power operations on September 20, 2019. By letter dated September 26, 2019, pursuant to 10 CFR 50.82(a)(1)(ii), Exelon certified to the NRC that all fuel had been permanently removed from the TMI-1 reactor vessel and placed in the spent fuel pool as of September 26, 2019. Accordingly, pursuant to 10 CFR 50.82(a)(2), the TMI-1 RFOL no longer authorizes operation of the reactor or emplacement or retention of fuel in the reactor vessel.

By letter dated April 5, 2019, Exelon provided to the NRC a Post-Shutdown Decommissioning Activities Report (PSDAR) for TMI-1. The PSDAR reflected the use of a safe storage condition (SAFSTOR), thereby reflecting plans to complete decommissioning within a 60-year period after the permanent cessation of operations. The PSDAR referenced a site-specific decommissioning cost estimate (DCE) and an updated Spent Fuel Management Plan (SFMP). The staff's review of the PSDAR and SFMP concluded that Exelon demonstrated reasonable assurance that funding will be available to decommission TMI-1 pursuant to the SAFSTOR method and that the activities and associated costs of the TMI-1 SFMP appear reasonable. Exelon previously received an exemption from 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(1)(iv) that allows use of the TMI-1 DTF for spent fuel management at TMI-1.

### II. Request/Action

By letter dated May 20, 2021, the licensee, pursuant to 10 CFR 50.12, "Specific exemptions," submitted a request for exemption from the specific requirements of 10 CFR 50.82(a)(8)(i)(A) and 50.75(h)(1)(iv). The exemptions from 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(1)(iv) would permit CEG to make withdrawals from the TMI-1 DTF for site restoration activities at TMI-1. The exemption from 10 CFR 50.75(h)(1)(iv) would also permit the licensee to make these withdrawals without prior notification to the NRC, similar to withdrawals for decommissioning activities made in accordance with 10 CFR 50.82(a)(8).

The funds within the TMI-1 DTF were collected in compliance with the 10 CFR 50.75, "Reporting and recordkeeping for decommissioning planning," financial requirements while
