

painting, plastering, welding, and glazing); (3) maintenance activities (e.g., bulb replacement and automation of the light system); and (4) human presence, thereby resulting in behavioral disturbance of pinnipeds. Therefore, the Society requests authorization to incidentally take marine mammals by harassment.

To date, NMFS has previously issued nine incidental harassment authorizations (IHAs) to the Society to take marine mammals incidental to the lighthouse maintenance and preservation project at NWSR, Del Norte County, California for the same activities from 2010 to 2019. Previous IHAs, monitoring reports, and related reference materials are available for review at <https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-research-and-other-activities>.

Specified Activities

The Station, listed in the National Park Service's National Register of Historic Places, is located on NWSR approximately 7 km offshore of Crescent City, California in the northeast Pacific Ocean. The Station, built in 1892, rises 45.7 meters (m) (150 feet (ft)) above sea level. The structure consists of hundreds of granite blocks topped with a cast iron lantern room and covers much of the surface of the islet. The purpose of the project is to restore the lighthouse, to conduct tours, and to conduct annual and emergency maintenance on the Station's optical light system.

The Society proposes to conduct aircraft operations, lighthouse renovation, and periodic maintenance on the Station's optical light system on a monthly basis. The Society's activity will occur on one weekend per month, November through April. California sea lions (*Zalophus californianus*), harbor seals (*Phoca vitulina*), Steller sea lions (*Eumetopias jubatus*) of the eastern U.S. Stock, and northern fur seals (*Callorhinus ursinus*) have been observed in the area.

Information Solicited

Interested persons may submit information, suggestions, and comments concerning the Society's request (see **ADDRESSES**). NMFS will consider all information, suggestions, and comments related to the request during the development of proposed regulations governing the incidental taking of marine mammals by the Society, if appropriate.

Dated: June 2, 2020.
