Affected entities: Entities potentially affected by this action are the state environmental commissioners.

Title: ECOS Survey of State Performance Measures.

Abstract: The survey in question asks state environmental commissioners to report on their contribution to enforcement and compliance assistance for 2000-2003. They are asked to refer to their own records and account for the number of inspections, reviews, complaints etc. that have taken shape during this time. They are also asked to

give the number and type of mechanisms and fines applied and collected. It also questions if and how the states feel they have been effective using these methods. There is a section of the survey asking the states to rate how important and useful they feel the statistics and reports required by the EPA are in conveying the current conditions within their borders. Importantly, the survey also aims to capture information about state activity in outcome measurement. In particular, it asks states about their experiences with compliance rate measurement and with calculating the environmental benefits of enforcement actions and compliance assistance. The survey is designed to capture compliance rates and activities directly from state records. This will provide a means in which the states' efforts to promote the EPA's philosophy on enforcement and compliance can be more readily monitored. The responses to this collection of information are voluntary. The information obtained by this survey is completely confidential unless a state wants their information to be publicized. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9. This survey will provide information that will assist in the creation of a report. This will show if there is a discrepancy in the data found in the states databases and EPA's database. In addition to providing the EPA with the information it needs to more successfully function in the way it was designed to, this survey is also keeping the states burden at a minimum. This is being done by the use of electronic responses.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic,

mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: The survey will be distributed to one representative from each state. An estimated 49 voluntary responses will be retrieved. EPA estimates that participating entities may need to spend between one to two hours completing this survey. A total of 98 hours may be spent to provide EPA and ECOS with this data. This burden hour estimate translates to a cost of \$75/39per entity that voluntarily completes the survey resulting in the total of \$3,694.21 (based on labor rates obtained from the United States of Commerce, Bureau of Labor Statistics, December 2003, State and local government, by occupational and industry group). There should be no additional capital or other non-labor costs.

Affected Entities: 50.

Estimated Number of Respondents: 49.

Frequency of Response: one time.

Estimated Total Hour Burden: 98 hours.

Estimated Total Capital and Other Non-labor Costs: \$0.

Estimated Total Labor Costs: \$3,694.21.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Office Director, Office of Compliance, Office of Enforcement and Compliance Assurance.

National Oil and Hazardous Substance Pollution Contingency Plan (NCP) Information Collection Request Renewal, EPA ICR Number 1463.05, OMB Control Number 2050-0096

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit a continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB). This is a request to renew an existing approved collection: ICR 1463.05. This ICR is scheduled to expire on October 31, 2004. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below. ICR 1463.05 addresses the portion of the NCP that details the requirements for remedial activities at sites on the National Priority List (Superfund Sites). The NCP is the rule that stipulates requirements for fulfilling the legislative mandates of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 as amended (CERCLA or Superfund). The information collected via these activities is critical to characterizing contamination at sites, determining appropriate remedies and goals for cleanup, and involving the community in the process. All of these steps help ensure that some of the nation's worst hazardous waste sites are cleaned up in a manner that is protective of human health and the environment, and, where practical, returned to productive use.
