SUPPLEMENTARY INFORMATION:

I. Background

The OSMRE maintains the INTERIOR/OSM–12, Blaster Certification, system of records to manage the certifications of blasters in Federal Program States and on Indian Lands in compliance with the provisions of the Surface Mining Control and Reclamation Act of 1977. The OSMRE Blaster Certification system of records serves as a tool for OSMRE to grant blaster applicants' certificates for issuance, renewal, reissuance and reciprocity status, administration, and notification procedures, as well as to provide an adequate record-keeping system for compliance with a Federal program and enable OSMRE as the regulatory authority to effectively monitor its program requirements.

OSMRE is publishing this revised notice to update the bureau designation in the SORN number from “OSM–12” to “OSMRE–12” in order to reflect the bureau's full title of Office of Surface Mining Reclamation and Enforcement; update the system location and system manager and address; update legal authorities; propose new and modified routine uses; update the categories of records to provide additional information on the types of data maintained in the records; update the records retention schedule; update the sections for record access, notification, and contesting record procedures to clarify how individuals may submit Privacy Act requests; and provide general and administrative updates to

remaining sections to accurately reflect the management and scope of the system in accordance with the Office of Management and Budget (OMB) Circular A–108, *Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act*.

OSMRE is updating its routine uses from a numerical to alphabetical listing and is proposing to modify existing routine uses to provide clarity and transparency and reflect updates consistent with standard Departmental routine uses. Routine uses A, B, D, J, and O have been modified to provide additional clarification regarding external organizations and circumstances where disclosures are proper and necessary to facilitate the management of blaster certifications. Routine use A was modified to further clarify disclosures to the Department of Justice or other Federal agencies, when necessary, in relation to litigation or judicial proceedings. Routine use B was modified to clarify disclosures to a congressional office responding to or resolving an individual's request made to that office. Routine use D was modified to clarify the sharing of information with appropriate Federal, State, local, foreign agencies, or other public authority agencies responsible for investigating or prosecuting violations of, or for enforcing, or implementing, a statute, rule, regulation, order, or license. Modified routine use J would allow the Department to share information with appropriate Federal agencies or entities when reasonably necessary to respond to a breach of personally identifiable information and to prevent, minimize, or remedy the risk of harm to individuals or the Federal Government resulting from a breach in accordance with OMB Memorandum M–17–12, *Preparing for and Responding to a Breach of Personally Identifiable Information*. Routine use O was modified to include Federal and Tribal officials who may have responsibility for obtaining information relevant to a Federal blaster.

OSMRE is proposing new routine uses to facilitate the sharing of information with agencies and organizations to ensure the efficient and effective management of the Blaster Certification system of records or to carry out a Departmental or other Federal Government statutory responsibility. Proposed routine use C would facilitate the sharing of information with the Executive Office of the President to respond to an inquiry by the individual to whom that record pertains or a third party on the individual's behalf. Proposed routine use E facilitates

sharing of information with an official of another Federal agency to assist in reconciling or reconstructing data files or to enable that agency to respond to an inquiry by the individual to whom the information pertains. Proposed routine use F would allow OSMRE to share information with agencies when relevant for hiring and retention or issuance of a security clearance, license, contract, grant, or benefit. Proposed routine use G would allow OSMRE to share information with the National Archives and Records Administration (NARA) to conduct records management inspections. Proposed routine use H would allow OSMRE to share information with external entities, such as State, Tribal, territorial, and local governments, and Tribal organizations, in response to court orders and/or for discovery purposes related to litigation. Proposed routine use I allows OSMRE to share information with organizations that perform services on the Department's behalf to carry out the purposes of the Blaster Certification system of records. Proposed routine use L would allow OSMRE to share information with the OMB during the coordination and clearance process in connection with legislative affairs. Proposed routine use M would allow OSMRE to share information with the Department of the Treasury to recover debts owed to the United States. Proposed routine use N would allow OSMRE to share information with the news media and the public if there is a legitimate public interest in the disclosure of the information.

II. Privacy Act

The Privacy Act of 1974, as amended, embodies fair information practice principles in a statutory framework governing the means by which Federal agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to records about individuals that are maintained in a "system of records." A "system of records" is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. The Privacy Act defines an individual as a United States citizen or lawful permanent resident. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of the Department by complying with Departmental Privacy Act regulations at 43 CFR part 2, subpart K, and following the procedures outlined in the Records Access, Contesting Record, and

Notification Procedures sections of this notice.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the existence and character of each system of records that the agency maintains, and the routine uses of each system. The INTERIOR/OSMRE–12, Blaster Certification, system of records notice is published in its entirety below. In accordance with 5 U.S.C. 552a(r), the Department has provided a report of this system of records to the Office of Management and Budget and to Congress.

III. Public Participation

You should be aware that your entire comment, including any personally identifiable information, such as your address, phone number, email address, or any other personal information, may be made publicly available at any time. While you may request that your personally identifiable information be withheld from public review, we cannot guarantee that it will be able to do so.
