Announcement of Public Meeting

In light of these latest findings from the resampling analysis, the Access Board has decided to hold a public hearing to gather additional information on the low transfer height for MDE transfer surfaces from disability advocates, manufacturers of MDE, researchers and other stakeholders and interested parties. The Board is particularly interested in information on what the low height is for adjustable MDE products that are currently on the market and any changes or innovations in their design and engineering that may have occurred since the Board issued the MDE standards in 2017. The Board is aware of at least some examination tables and chairs that can adjust to a height of 17 inches or less. The Board is also interested in updated information on the incremental costs for the design or redesign and manufacture of examination tables and chairs and diagnostic imaging medical equipment with tables that can provide a low transfer height of 17 inches.

Christopher Kuczynski,

General Counsel, U.S. Access Board.

Background

On May 6, 2016, Commerce published in the **Federal Register** the CVD orders on PET resin from China and India.¹ On March 31, 2021, Commerce published the notice of initiation of the sunset reviews of the *Orders*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).² Commerce conducted expedited (120-day) sunset reviews of these *Orders*, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2).

As a result of its reviews, Commerce determined, pursuant to sections 751(c)(1) and 752(c) of the Act, that revocation of the *Orders* would likely lead to continuation or recurrence of countervailable subsidies.³ Commerce, therefore, notified the ITC of the magnitude of the net countervailable subsidy rates likely to prevail should the *Orders* be revoked.⁴ On April 4, 2022, the ITC published its determination, pursuant to section 751(c) of the Act, that revocation of the *Orders* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.⁵

Scope of the Orders

The merchandise covered by these *Orders* is polyethylene terephthalate (PET) resin having an intrinsic viscosity of at least 0.70, but not more than 0.88, deciliters per gram. The scope includes blends of virgin PET resin and recycled PET resin containing 50 percent or more virgin PET resin content by weight,
