

estimates of crop and livestock production, disposition and prices, economic statistics, and environmental statistics related to agriculture and to conduct the Census of Agriculture and its follow-on surveys. As pollinators (honeybees) are vital to the agricultural industry for producing food for the world's population, NASS' primary focus will center on costs associated with honey bee pollination, but will also collect some basic information relating to other forms of pollination. General authority for these data collection activities is granted under U.S.C. Title 7, Section 2204.

Need and Use of the Information: NASS plans to collect economic data under this new collection using the "Cost of Pollination Inquiry" survey. Data relating to the targeted crops (fruits, nuts, vegetable and specialty crops) will be collected for the total number of acres that rely on honey bee pollination, the number of honey bee colonies that were used on those acres, and any cash fees associated with honey bee pollination. By publishing both regional and crop specific pollination costs, both, crop farmers and beekeepers will be able to benefit from this additional data.
