

### Factor 8: The Impact of Standards on Other Relevant Factors

The January 2017 Determination also identified regulatory certainty as an additional relevant factor that was considered as part of the determination. EPA understands that automakers and suppliers plan many years in advance.<sup>27</sup> Given such long lead times, regulatory certainty can increase the efficiency of business planning and investment cycles. The Administrator agrees that regulatory certainty is extremely important, but is reconsidering its conclusion that maintaining the current standards is the best way to provide such certainty.

Furthermore, industry cannot effectively plan for compliance with the current MY 2022–2025 GHG standards until it knows the outcome of the upcoming NHTSA rulemaking for MY 2022–2025 CAFE standards. Any regulatory certainty potentially provided by the January 2017 Determination is not supported by the fact that NHTSA had not yet begun their statutorily required rulemaking process, and EPA did not know at that time whether NHTSA would establish coordinated requirements. EPA now believes that the greatest potential regulatory certainty is provided in the long run by undertaking a new rulemaking, in partnership with NHTSA, and ensuring that the resulting standards are harmonized to the greatest degree possible.

### IV. Revised Determination

Even with the wide range in perspectives, it is clear that many of the key assumptions EPA relied upon in its January 2017 Determination, including gas prices, and the consumer acceptance of advanced technology vehicles, were optimistic or have significantly changed. EPA has also both developed and received additional data and assessments since the January 2017 Determination regarding technology effectiveness and technology costs which warrant additional consideration. In addition, the reach and success of the program is significantly limited when consumers do not purchase new vehicles with low GHG emissions, either because they are priced out of them or are unwilling to spend additional money on advanced fuel-saving technologies.

<sup>27</sup> To note, some commenters raised concerns that reevaluating the standards increases uncertainty that might reduce investment in advanced technologies that could hurt jobs and United States competitiveness. As mentioned below, EPA disagrees with this concern as NHTSA must still complete a rulemaking for MY 2022–2025.

Based on our review and analysis of the comments and information submitted, the Administrator believes that the current GHG program for MY 2022–2025 vehicles presents difficult challenges for auto manufacturers and adverse impacts on consumers. On the whole, the Administrator believes the MY 2022–2025 GHG emission standards are not appropriate and, therefore, should be revised as appropriate. EPA, in partnership with NHTSA, will further explore the appropriate degree and form of changes to the program through a notice and comment rulemaking process.

As stated above, in this notice, the Administrator has determined that the standards are not appropriate in light of the record before EPA, and therefore, should be revised as appropriate. EPA is also withdrawing the January 2017 Determination with this notice. EPA, in partnership with NHTSA, will initiate a notice and comment rulemaking in a forthcoming **Federal Register** notice to further consider appropriate standards for MY 2022–2025 light-duty vehicles. This notice concludes EPA's MTE under 40 CFR 86.1818–12(h). Finally, EPA notes, as discussed above, that this revised determination is not a final agency action, as explained in the 2012 final rule. The effect of this action is rather to initiate a rulemaking process whose outcome will be a final agency action. Until that rulemaking has been completed, the current standards remain in effect and there is no change in the legal rights and obligations of any stakeholders.

**II. Background**

This cancellation order follows an August 3, 2017 **Federal Register** Notice of Receipt of Requests from the registrants listed in Table 2 of Unit III. to voluntarily cancel these product registrations. In the August 3, 2017 notice, EPA indicated that it would issue an order implementing the cancellations, unless the Agency received substantive comments within the 180-day comment period that would merit its further review of these

requests, or unless the registrants withdrew their requests. The Agency received six general comments on the August 3, 2017 notice but none merited its further review. The registration numbers below were listed in the August 3, 2017 notice but already have been canceled by other **Federal Register** notices so are not listed in this notice. The products are listed by their cancellation **Federal Register** notice: (1) **Federal Register** of November 10, 2010 (75 FR 69065; FRL-8852-4) with cancellation effective July 31, 2016: 66222-62, 66222-63, ID 980003 and WA 980012; and (2) **Federal Register** of August 29, 2017 (82 FR 41017; FRL-9964-27): 498-180. Accordingly, EPA hereby issues in this notice a cancellation order granting the requested cancellations. Any distribution, sale, or use of the products subject to this cancellation order is permitted only in accordance with the terms of this order, including any existing stocks provisions.

Section 4(i)(5) of FIFRA (7 U.S.C. 136a-1(i)(5)) requires that all pesticide registrants pay an annual registration maintenance fee, due by January 15 of each year, to keep their registrations in effect. This requirement applies to all registrations granted under FIFRA section 3 (7 U.S.C. 136a) as well as those granted under FIFRA section 24(c) (7 U.S.C. 136v(c)) to meet special local needs. Registrations for which the fee is not paid are subject to cancellation by order and without a hearing.

Under FIFRA, the EPA Administrator may reduce or waive maintenance fees for minor agricultural use pesticides when it is determined that the fee would be likely to cause significant impact on the availability of the pesticide for the use.

In fiscal year 2017, maintenance fees were collected in one billing cycle. In late October of 2016, all holders of either FIFRA section 3 registrations or FIFRA section 24(c) registrations were sent lists of their active registrations, along with forms and instructions for responding. They were asked to identify which of their registrations they wished to maintain in effect, and to calculate and remit the appropriate maintenance fees. Most responses were received by the statutory deadline of January 15, 2017. A notice of intent to cancel was sent in April of 2017 to companies who did not respond and to companies who responded, but paid for less than all of their registrations. Since mailing the

notices of intent to cancel, EPA has maintained a toll-free inquiry number through which the questions of affected registrants have been answered.

In fiscal year 2017, the Agency has waived the fee for 338 minor agricultural use registrations at the request of the registrants. Maintenance fees have been paid for about 16,136 FIFRA section 3 registrations, or about 97% of the registrations on file in October 2016. Fees have been paid for about 1,859 FIFRA section 24(c) registrations, or about 87% of the total on file in October 2016. Cancellations for non-payment of the maintenance fee affect about 166 FIFRA section 3 registrations and about 13 FIFRA section 24(c) registrations. These cancellations can be found in Table 3 of Unit III. Cancellations for companies paying the fee at one of the capped payment amounts are considered voluntary cancellations since the registration could be maintained without an additional fee payment. These cancellations are subject to a 180-day comment period and are listed in Table 1 of Unit III.

The cancellation orders generally permit registrants to continue to sell and distribute existing stocks of the canceled products until January 15, 2018, 1 year after the date on which the fee was due. Existing stocks already in the hands of dealers or users, however, can generally be distributed, sold, or used legally until they are exhausted. Existing stocks are defined as those stocks of a registered pesticide product which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation order.

The exceptions to these general rules are cases where more stringent restrictions on sale, distribution, or use of the products have already been imposed, through special reviews or other Agency actions. These general provisions for disposition of stocks should serve in most cases to cushion the impact of these cancellations while the market adjusts.

**III. What action is the Agency taking?**

This notice announces the cancellation, as requested by registrant, of products registered under FIFRA section 3 (7 U.S.C. 136a). These registrations are listed in sequence by registration number in Table 1 of this unit.
