Selection of winner(s): Average Climate Capture Width per Characteristic Capital Expenditure (ACE) has been selected by the Wave Energy Prize as a reduced content metric that is a proxy for leveled cost of energy. To be eligible for consideration for prize purses, WEC devices tested during the Prize must exceed a threshold value of ACE of three meters per million dollars, representing a 100% increase, or doubling, of ACE above the current "state of the art" in representative sea states and deep water. WEC devices that surpass the ACE threshold will be ranked according to their Hydrodynamic Performance Quality (HPQ), a metric that holistically evaluates WEC performance and reliability. This HPQ ranking will be used to determine the Grand Prize Winner, 2nd Place Finisher, and 3rd Place Finisher of the Wave Energy Prize. Further details on these technical requirements are available in the Prize Rules and Terms and Conditions at waveenergyprize.org.

Issued on April 27, 2015 in Washington, DC.
