Take notice that on January 13, 2021, Northern Natural Gas Company (Northern), 1111 South 103rd Street Omaha, NE 68124–1000, filed an application under section 7(c) of the Natural Gas Act (NGA), and Part 157 of the Commission's regulations requesting authorization to: (1) Establish a buffer zone around the storage facility; (2) designate five geological formations as gas-containing vertical buffer zones; and (3) to recognize the inclusion of the Lower Eau Claire formation into the geologically continuous Mt. Simon A zone of the Mt. Simon gas storage reservoir, all at the Redfield storage facility located in Dallas County, Iowa. Northern seeks authorization for the establishment of a buffer zone approximately one-half mile around the mapped gas extent consisting of approximately 4,847 acres. Northern also seeks authority to establish five geological formations that are currently non-storage formations as buffer formations: The Prairie Du Chien formation; the Franconia formation; the Decorah-Platteville formation; the Fort Atkinson formation; and the Gower 2 formation. The proposed changes will not change the certificated physical parameters, including the certificated storage capacity, of the Field. No new aboveground facilities will be required for the authorities sought herein, all as more fully set forth in the request which is on file with the Commission and open to public inspection.
