Title: Diversions, Return Flow, and Consumptive Use of Colorado River Water in the Lower Colorado River Basin.

OMB No.: 1006-0015.

Abstract: Reclamation delivers Colorado River water to water users for diversion and beneficial consumptive use in the States of Arizona, California, and Nevada. Under Supreme Court order, the United States is required, at least annually, to prepare and maintain complete, detailed, and accurate records of diversions of water, return flow, and consumptive use. This information is needed to ensure that a State or a water user within a State does not exceed its authorized use of Colorado River water. Water users are obligated to provide information on diversions and return flows to Reclamation by provisions in their water delivery contracts. Reclamation determines the consumptive use by subtracting return flow from diversions or by other engineering means. Without the information collected, Reclamation could not comply with the order of the United States Supreme Court to prepare and maintain detailed and accurate records of diversions, return flow, and consumptive use.

Description of respondents: The Lower Basin States (Arizona, California, and Nevada), local and tribal entities, water districts, and individuals that use Colorado River water.

Frequency: Annually, or otherwise as determined by the Secretary of the Interior.

Estimated completion time: An average of 6 hours per respondent.

Annual responses: 54 respondents.

Annual burden hours: 324.

Dated: February 7, 2000.

Acting Area Manager, Boulder Canyon Operations Office, Lower Colorado Region.

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA-W) issued during the period of January and February, 2000.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.
