

individual names as a result [of] the post-importation assembly.” The court also found that the components had a pre-determined end-use as parts and components of a Generation II flashlight at the time of importation and did not undergo a change in use due to the post-importation assembly process. Finally, the court did not find the assembly process to be sufficiently complex as to constitute a substantial transformation. Thus, the court found that Energizer’s imported components did not undergo a change in name, character, or use as a result of the post-importation assembly of the components into a finished Generation II flashlight. The court determined that China, the source of all but two components, was the correct country of origin of the finished Generation II flashlights under the government procurement provisions of the TAA.

The production process of the Axion series LED video display cabinets is similar to that of the Generation II flashlight in *Energizer*. All but two components are sourced from Taiwan. The post-importation assembly process involves manual assembly of components that are dedicated for use as components of the LED video display cabinets. The individual components do not lose their separate identities as a result of the assembly process and do not undergo a change in their pre-determined uses. The assembly process, while more time consuming than that in *Energizer*, is not sufficiently complex as to amount to a substantial transformation of the imported components. Considering the totality of the information provided to CBP, and relying upon the court’s application of substantial transformation in *Energizer*, we find that the country of origin of the assembled Axion series LED video display cabinets, produced as described herein, is Taiwan.

HOLDING:

Based on the information provided, and the analysis set forth above, the imported components of the Axion series LED video display cabinets are not substantially transformed as a result of their assembly in the United States. Therefore, the country of origin of the assembled Axion series LED video display cabinets at issue, is Taiwan, the country where all of the components of the Axion series LED video display cabinets, except two, are made.

Notice of this final determination will be given in the **Federal Register**, as required by 19 CFR 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 CFR 177.31, that

CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 CFR 177.30, any party-at-interest may, within 30 days after publication of the **Federal Register** notice referenced above, seek judicial review of this final determination before the Court of International Trade.

Sincerely,

Alice A. Kipel,

*Executive Director Regulations and Rulings
Office of Trade.*
