Transportation Security Administration

Intent To Request Approval From OMB of One New Public Collection of Information: Exercise Information System

AGENCY: Transportation Security Administration, DHS.

ACTION: 60-day Notice.

SUMMARY: The Transportation Security Administration (TSA) invites public comment on a new Information Collection Request (ICR) abstracted below that we will submit to the Office of Management and Budget (OMB) for approval in compliance with the Paperwork Reduction Act (PRA). The ICR describes the nature of the information collection and its expected burden for the TSA Exercise Information System (EXIS). EXIS is a Web portal designed to serve stakeholders in the transportation industry in regard to security training exercises. It provides stakeholders with exercise information tailored to the transportation industry, best practices, and previous work for use in future exercises. It also allows stakeholders to design their own security exercises based on the unique needs of their specific transportation mode or method of operation. Utilizing and inputting information into EXIS is completely voluntary.

DATES: Send your comments by March 7, 2011.

ADDRESSES: Comments may be e-mailed to TSAPRA@dhs.gov or delivered to the TSA PRA Officer, Office of Information Technology (OIT), TSA-11, Transportation Security Administration, 601 South 12th Street, Arlington, VA 20598-6011.

FOR FURTHER INFORMATION CONTACT: Joanna Johnson at the above address, or by telephone (571) 227-3651.

SUPPLEMENTARY INFORMATION:

Comments Invited

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or

sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation is available at <http://www.reginfo.gov>. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

- (1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of the agency's estimate of the burden;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

Purpose of Data Collection

The Exercise Information System (EXIS) is an Internet-accessible knowledge-management system developed by TSA serving stakeholders—industry, port authorities, Federal agencies, and State and local governments—and integrating other security-related training and exercise components at the sensitive security information level. It gives stakeholders valuable exercise information tailored to the transportation industry, best practices, and previous work for use in future exercises. With EXIS, transportation industry stakeholders can choose scenarios and objectives based on their particular needs, such as their transportation modes, or their regulated areas of operation.

EXIS is a data management system that provides end-to-end security exercise support, from the initial planning meeting, through exercise design, implementation, evaluation, and reporting. Working in a secure online environment, EXIS users can easily:

- Customize exercise design—develop objectives, scenarios, Master Scenario Events List (MSEL) items, contingency injects, evaluation metrics, and other data sets.
- Conduct robust analyses—sort evaluation data by exercise objectives, transportation modes, scenario types, or functional areas.
- Create analytical reports—identify and sort lessons learned, corrective actions, and best practices from past exercises or from those of other jurisdictions.

- Collaborate and share information—build relationships with partners.

EXIS was developed by TSA as part of its broad responsibilities and authorities under the Aviation and Transportation Security Act (ATSA),¹ and delegated authority from the Secretary of Homeland Security, for “security in all modes of transportation * * * including security

responsibilities * * * over modes of transportation that are exercised by the Department of Transportation.”² It is a component of TSA’s Intermodal Security Training Exercise Program (I-STEP), which works with surface transportation stakeholders in developing and conducting security exercises. The I-STEP also fulfills requirements of the Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act)³ regarding the establishment of security training exercises for surface modes of transportation that can assess and improve the capabilities of these modes in preventing, preparing for, mitigating against, responding to, and recovering from acts of terrorism.⁴

EXIS helps users design an exercise through the use of a “wizard.” The wizard walks the user through a step-by-step process allowing them to build a profile for their exercise. EXIS provides users with suggested scenarios and Master Scenario Events List (MSEL) items based on the area of focus and objectives selected by the user. Users also have the ability to create custom MSEL items or modify a Generic EXIS Community Scenario. Exercise Administrators may suggest modified scenarios and custom MSEL items for the MSEL and scenario libraries.

At the completion of the wizard, EXIS generates a collaborative workspace for exercise team members to work within. All exercise elements can be customized
