

proposal to move to a three-year update cycle, beginning with this 2022 update (*i.e.*, the next update will be in 2025 instead of 2024). We are seeking comments on the proposed change in frequency of NWPL updates or whether we should remain with biennial updates or move to some other update frequency.

Instructions for Providing Comments Online

USACE encourages public input in the form of data, comments, literature references, or field experiences, to help clarify the status of the species reviewed for this update. These same two reviewed species, and their proposed 2022 wetland ratings for the AW region, can be viewed at the NWPL homepage, <https://wetland-plants.sec.usace.army.mil/> under “2022 NWPL Update Information.” A link to provide general or species-specific comments in response to this notice is also available at this location. Users are encouraged to submit literature citations, herbaria records, experiential references, monitoring data, and other relevant information. Specific knowledge of, or studies related to, individual species are particularly helpful. When providing input or information on the proposed changes to the 2022 NWPL update, commenters should use their regional botanical and ecological expertise, field observations, reviews of the most recent indicator status information, appropriate botanical literature, floras, herbarium specimens with notation of habitat and associated species, habit data, relevant studies, and historic list information. Providing ratings without supporting documentation or information is not recommended. All submitted comments and information will be compiled and sent to the NWPL NP for their review and consideration.

In addition to requests for comments on the proposed changes to wetland indicator status ratings for two plant species in the AW region as well as the frequency of NWPL updates, USACE is also seeking comments on the overall NWPL update process. Detailed information on the update process, protocol, and technical issues can be found in the following documents, which are available on the “NWPL Publications” web page:

to conduct targeted surveys as needed to determine the impact of individual communication activities. CHINFO collects both qualitative and quantitative primary research data. The quantitative research is conducted quarterly using an existing online panel of at least 1,000 randomly sampled American adults. Quantitative research is also conducted at Navy events to determine the events' impact on Americans' perception of their Navy. Additionally, four times per year, the Navy will conduct pre-test and post-test pulse assessments to gauge the effectiveness of communication campaigns managed by CHINFO. These pulse assessments will be conducted either quantitatively or qualitatively.
